

Par on any course!

When it comes to effective vegetation control, you can keep your score down by planning your spraying program around Dow's dependable weed, brush and grass killers. Dow offers a complete line—EIGHT different formulations—each designed for specific maintenance

needs. They do a quick, thorough job. They're designed to work *together* or *separately* to help you keep your course groomed as you want it—and your maintenance budget *below par*. Ask any Dow distributor or write to Midland for literature.

A partial list of Dow weed and grass killers:

ESTERON 44: A powerful weed killer especially effective against annual and perennial weeds, including white clover.

2-4 DOW WEED KILLER, FORMULA 40: A 2,4-D amine weed killer. Formula 40 is deadly against broad-leaf weeds. An effective, all-purpose weed killer for turf use.

DOW GENERAL WEED KILLER: Effective in controlling vegetation in areas where mowing is impractical by killing back top growth. Established perennial plants recover—a "chemical mower".

ESTERON BRUSH KILLER: This hard-working brush killer controls stubborn brush, brambles, poison oak, poison ivy and woody growths which narrow your fairways.

DOW SODIUM TCA 90%: Spray unwanted grasses with this new Dow grass control agent. Effective control of Johnson, quack, Bermuda, and many annual grasses.
