WITH ELECTRONIC U.S. ROYAL

Electronically wound, U. S. Royals never vary from the highest standards of perfection. Inside the sparkling white, precision molded Gadwell cover, Electronic Winding wraps the Silicone "Magic" Center with absolute uniform balance.

U. S. Royal, with the new mesh-marked Gadwell cover, brings the return of a favorite—now for the first time with Electronic Winding and Silicone "Magic" Center. This ball is identical in every way with the famous dimple-marked U. S. Royal except for the distinctive mesh-marked cover—a design preferred by many leading players in the past.

Try this new addition to the U. S. Royal Golf Ball family. See how the mesh-marked U. S. Royal or U. S. True Blue may improve your game. Conforms to all U.S.G.A. specifications.

Exclusive! **PLASTIGUARD WRAP**—Detach new ball from chain. Simply shell or peel off acetate jacket. Leaves other balls protected from dirt and discoloration.

Exclusive! **U. S. ENSOLITE**—The only practice ball that looks like a real golf ball... evaluates your performance... goes for a short distance... practically indestructible.
