

BECAUSE it is light and easy to handle...

Triangle Flexible Plastic Pipe is amazingly light! Crew's time and effort is reduced to a minimum. The pipe can be moved to new spots at will. Being flexible, it goes around obstructions.

Obviously, a pipe so much easier to handle means important savings.

BECAUSE it won't rot, rust, corrode or freeze...

Thousands and thousands of feet of ordinary golf course pipe have to be replaced annually because of corrosion and rust, among many common failures. There are no such drains on your maintenance budget when you use Triangle Flexible Pipe. This pipe is guaranteed against rot, rust and corrosion. In addition, because Triangle Flexible Pipe expands with freezing water, the frost line presents no problem.

BECAUSE it is tough...

Triangle Flexible Pipe can take a beating. It can be dragged over rough terrain and it can be buried shallow or deep. Moreover, it can take pressure. Every coil of Triangle Flexible Pipe is thoroughly tested to far exceed its rated working pressure.

TRIANGLE Plastic Pipe is a *Natural* for your course

Why don't you try this remarkable pipe? The men who handle it will be enthusiastic and you will soon see marked savings on the course budget. Try it—and prove it to yourself.

infant growing pains . . . And without making a habit of the sort of brawls that have given bad publicity to the men pros' tournament circuit growth . . . After all it is the "Ladies" PGA . . . And so far as we have seen the girl pros are ladies, with the poise, judgment and manners implied by the identification of "lady."

Club manufacturers and home club pros who sell women's clubs and have yielded large amounts to lady tournament golfers and women's golf promotion are puzzled by being blamed for Ladies' PGA teapot tempest . . . Don't believe passing the buck to them promotes more money for women pro golfers.

Women's play and, at last, women's club sales have been showing substantial increase . . . Sales ratio still short of women's play increase at majority of clubs, pros say . . . Pros also remark that shafts on women's clubs should be longer as young women are much taller than preceding generation.

Shortage of name stars for tournament appearance serious problem in men's pro golf as lately disclosed by cancellation of Inverness Round Robin, for 19 years a pro invitation fixture with the club picking up all expenses and all players getting prize

DOLGE TESTED PRODUCTS FOR YOUR MAINTENANCE PROBLEMS

CINET — Liquid synthetic detergent for general cleaning.

DOLCOWAX — Premium quality floor wax — improves with traffic!

The Combination that Counts!

the surface

the soil

VERTI-CUT*

AERIFIER*

The Verti-cut is a new machine, but an important one. There is a need for the Verti-cut on every grass putting green. Superintendents will recognize that the Verti-cut reduces the disease problem. It removes the excess surface material that harbors disease organisms. Golfers will appreciate the improved surface created by Verti-cutting. The Verti-cut eliminates graininess and provides the perfect putting surface demanded by the golfers.

Taking care of the surface is only part of the job. Soil is the foundation for the turf. A well-developed root system is necessary to support healthy top growth. Use the Aerifier frequently to renew soil structure. The Aerifier's patented "cultivating action" provides ideal conditions for vigorous root growth. Loose-walled openings carry water, fertilizer and air into the soil. "Cultivating action" loosens soil in the rootbed. New roots are able to penetrate the loosened soil and develop fully.

The Aerifier and the Verti-cut are an essential combination of tools to maintain turfgrass in the soil and on the surface.

money . . . Inverness has been having too much trouble to get an all-star field to continue the event.

Claude Harmon to write a book . . . With Claude's experience as developer of famous member talent at Winged Foot and Seminole, and club's he's served previously, his grand job in developing young pros he's had as assistants, and his own tournament record, the book job should be highly interesting and informative.

Wm. Johnson, supt., Los Angeles (Calif.) city courses advising Southgate (Calif.) on construction of its 9-hole 1100 yd. pitch-putt course . . . Johnson says Los Angeles experience with Los Feliz 1088 yd. 9-hole pitch-putt is awakening other municipalities to pitch-putt as an enthusiastically welcomed addition to municipal recreation facilities . . . And as one that pays for itself and finances additional munny recreation facilities . . . Los Feliz cost about \$11,000 for building and landscaping (using city equipment) and another \$11,000 for lighting . . . First 8 months play was 43,280 with about \$25,000 gross income . . . Johnson says on big reason southern California is leading the nation in work to correct shortage of golf facilities is that park and recreation officials and golf course supts.

A NEW ELM IS BORN

- Column-like stature
- Sturdy and ample crotches
- Strong anchorage — compact root system
- Vigorous growth — large leaves
- Great indestructibility to storms
- Allows sun to get to grass.

Greenkeepers have found this popular new elm variety ideal for enclosures, avenue and fairway borders, wind breaks, and boundary markers. For beauty and economy, it is unexcelled. Each scion produced by grafting so that all have the identical features of the original. Write to us for information. Publication "A New Elm is Born," sent on request.

Knock Out Turf Pests

with dieldrin

A single application of this powerful insecticide controls the major turf pests for years

Here's a sure way to save labor and expense on large scale applications of insecticide to turf. Use dieldrin . . . and get sub-surface turf pest control for years on end *with just one application!*

Count on dieldrin to stop Japanese beetle grubs, white grubs, lawn chinch bugs, ants and other turf destroyers. Dieldrin is easy to use and will not harm the finest grass.

It comes in four formulations. The one you use depends on the application equipment you have.

Dieldrin Granules: The latest formulation, dieldrin granules, can be applied in combination with fertilizer. Or in clay or tobacco carrier they can be applied as a

separate application. Dieldrin granules are easy to apply . . . and they get down to the roots where the pests are.

25% - 50% Dieldrin Wettable Powder: For use in high volume sprayers where large quantities of water are used. Ideal for application to large areas.

1.5 lb. Dieldrin Emulsible Concentrate: For low volume sprayers . . . only requires a fraction of the water required in larger equipment . . . for greater economy in applications to smaller areas.

Dieldrin Dusts: For use with conventional dust equipment . . . dieldrin dusts are even-textured and smooth-flowing.

Regardless of which formulation is best suited to your needs, you can depend on dieldrin to do the job. Technical information on dieldrin is available. Please write to:

A Beautiful Turf Begins Here!

WITH ...

CHLORDANE SOIL PROTECTION

Your turf can only be as beautiful as your soil will permit it to be. A soil infected with harmful lawn insects can seldom produce a healthy, attractive turf. That's why control of lawn insects with Chlordane is so important. Chlordane controls ants, chiggers, white grubs, earwigs, chinch bugs, mole crickets, Japanese beetle larvae and sod webworms or lawn moths. Talk with your supplier *today* about positive soil protection with Chlordane.
