

For Smooth, Tight Fairway Turf Use the AERIFIER* this Fall

Fairway turf responds to fall improvement work. Control weeds, use the AERIFIER, apply fertilizer, reseed where needed. Deep, thorough cultivation with the AERIFIER allows fertilizer and fall rains to move down into the root zone. Slopes need extra attention to reduce wasteful runoff. The vigorous root systems established now make a wear-resistant turf that will take traffic of people and machines.

The AERIFIER breaks up surface crust and provides the proper seedbed for reseeding into established turf. Keeps seed from washing off slopes. The seedbed produced by the AERIFIER is the closest thing to the honeycombed soil produced by natural freezing and thawing. With the AERIFIER you can create honeycombed soil in the fall, the most favorable time for seeding the turfgrasses.

Use a dragmat after the AERIFIER to provide a light topdressing to protect seed and to fill in little hollows to level the surface of fairways.

Use the AERIFIER to open soil in roughs to allow deep penetration of fall rains. It is easier to maintain proper moisture in the fairways when surrounding areas are deeply watered, too.

This fall use the AERIFIER fence-to-fence.

“Stronger, Better-colored Turf, Thanks to AGRICO”

One of the beautiful fairways at Pittsburgh Field Club, Aspinwall, Pittsburgh, Pa. Francis W. Krsul, Supt., of that well-known Club, says:

“During many years of experience I have had the opportunity to observe the results of Agrico Fertilizers compared with other brands. The final results have always been the same. Agrico lasts longer, builds stronger, better colored turf, deeper root growth, with little or no weeds.

“Last year I applied AGRICO COUNTRY CLUB Fertilizer regularly, feeding greens and tees hydraulically every 2 weeks. Our members and I are more than pleased with the results.

“It’s results like these with Agrico and Agrinite that give me good reason for using and recommending them to my Club members for their home use.”

ORDER AGRICO NOW... and be sure to try AGRINITE, the better, 100% natural organic with over 8% nitrogen. Ask your regular supplier, or write to The AMERICAN AGRICULTURAL CHEMICAL Co., 50 Church St., New York 7, N. Y.

sprinkler systems that fit to a tee!

YARDLEY PressuRated KRALASTIC PIPE

The quick, easy, economical installation of YARDLEY "K" PIPE has stepped up the modernization of golf courses everywhere . . . without exorbitant drain on the operations budget.

It's new when a pipe is developed that gives you features never before experienced . . . features of true permanence and 50% to 75% savings of installation costs. That's YARDLEY "K" PIPE.

Before installing a new sprinkler system or modernizing the old . . . *know* that Yardley PressuRated Kralastic Pipe carries an excess of 25% more flow than standard types of metal pipe for the same head loss . . . won't rot, rust or corrode . . . weighs $\frac{1}{2}$ as much as steel . . . engineered for every cold water use . . . is solvent welded in mere seconds . . . does not call for skilled labor.

Note the Yardley PressuRated feature . . . when you buy Yardley K-150 you get

150-lb. pressure rating in *every size* . . . from $\frac{1}{2}$ -inch to 6-inch. Eliminates costly errors. You can quickly select the proper type pipe for your requirements. Every 20-ft. length is plainly and permanently marked. The same goes for new Yardley K-100 for 100-lb. pressure. When you buy Yardley "K" Pipe you know for sure . . . go Yardley "K" all the way. Get Bulletin 151 for complete information.

EASY TO INSTALL

Easily and accurately cut to length by a few quick strokes of a hacksaw blade.

Permanent solvent welds with Yardley precision-made fittings are easily made in seconds.
