UNITED STATES RUBBER COMPANY

Bermudas and zoysia and the other half in bents. The Bermudas include 4 selections from Texas A&M (T-94; T-82; T-35A; T-83) and Tifton U-127, now named Tiffine. The bents are C-1; Pennlu (earlier numbered (10-37-4); C-19; C-52 and C-7. The zoysia is a fine-leaved hybrid Zt x Zj, 34-35, now released in Georgia and at Purdue as Emerald.

The surface slope is down from the warm season grasses to the bent grass part of the green so the warm season grasses can be kept dryer. The tile lines are 14 ft. apart, running across the line of surface drainage. The topsoil is very deep with the top 4 in. of soil as weed-free as can be had without actually sterilizing the soil.

The planting was done April 19 to 24 with the exception of C-1 bent which was planted May 6. The tile layout, soil mixture, fertilizing and planting was done by a Purdue student majoring in Turfgrass Management under Dr. Daniel. He was permitted to do this work as practice for his own benefit.

Most of the grasses were ready for putting by July 4. The C-1 bent was later because it was planted late. The C-19 was quite slow so was not a good surface until

in September. The C-7 was the first of the bents to make a surface, with Pennlu second and C-52 a close third. The T-94 and T-35 Bermudas came along fastest and made and held a finer surface than any other of the warm season grasses. The Emerald zoysia was very slow and was a putting surface only at the end of the season.

The entire area was given at least 1½ lbs. of nitrogen per 1,000 sq. ft. every 10 days until it became a putting green. This practice in the Cincinnati area is extreme abuse for bents.

The Pennlu, C-19 and C-52 were at least 40 per cent covered by large brownpatch on June 11. The C-7 had only two small patches. No brownpatch treatment was given purposely in order to learn how these grasses would withstand unreasonable abuse.

The high nitrogen abuse of the bents was favorable to the Bermudas' growth and runners grew as much as 1.5 in. per day. At this rate of growth it was impossible to get a true putting surface on the warm season grasses. During July and August lighter feedings were used, plus a Verti-Cut and ample good topdressing until the surface became good.

SCOT-SEAT CO.

31 N. FIRST STREET

PHOENIX, ARIZ.

I have made only temporary conclusions which are:

1. C-7. A good bent for Cincinnati, very susceptible to dollarpatch, but responds to treatment.

2. Pennlu—A very fine grass—extra fine color with good treatment, a good grass.

3. C-52; C-19; C-1—In the order named are not good grasses for the Cincinnati area because of crabgrass and disease infestations.

4. T-94. Very fine texture, fine color and does not travel too fast into surrounding grass.

5. T-35A. Very fine, except color. Same as T-94.

6. Emerald zoysia—Makes a good surface. Stiffer than Bermudas.

7. At this point Bermudas and good bents are holding original planting line. Emerald zoysia grows slowly so Bermuda quickly grew into zoysia plot.

8. When warm season grasses are cut at 3/16 in., properly fed and top-dressed many of our members could not tell which area was bent and which was Bermudas.

9. C-7 and Pennlu were the only bents dense enough to keep poa annua out in fall.

I want to thank Purdue University and

Texas A&M for their assistance in providing grasses to make this green possible.

Agree to Call Off Deal to Buy Spalding

Along with announcement of increased earnings for the first six months of the current fiscal year, A. G. Spalding & Bros., Inc. advises negotiations to absorb the Spalding company by a stock exchange has been called off.

The official statement:

"The estimated consolidated earnings of A. G. Spalding & Bros. Inc. for the six months ended April 30, 1955 were \$320,000 compared to \$200,000 for the same period of 1954—59¢ per share compared to 37¢ per share for 1954.

"The regular quarterly dividend of 25¢ per share was declared at the Directors Meeting held on May 20th—payable June 15th, 1955 to stockholders of record June 6th.

"In April a proposal was made by American Machine & Foundry to acquire the assets of Spalding through exchange of three-quarters of a share of American Machine & Foundry common stock for one

share of A. G. Spalding & Bros. stock. Following a complete study of Spalding by American Machine & Foundry and thorough consideration of the offer by the Directors of Spalding, it was mutually decided that terms could not be agreed upon which would appropriately serve the best interests of the stockholders of American Machine & Foundry and A. G. Spalding & Bros. Accordingly, the negotiations have been terminated.

"The plans for expansion and diversification of our business upon which management has been working for some time are now maturing."

BETTY JAMESON JOINS SPALDING ADVISORY STAFF

Betty Jameson, one of the most popular and competent women golf professionals, has returned to the Spalding golf advisory staff.

In April this year Miss Jameson won the Babe Zaharias Open with 210 for 54-holes. She finished 10 strokes ahead of Patty Berg, who was second in that event. The Jameson opening round of 65 on the 6,219 yd. Beaumont (Tex.) CC course was praised by Miss Berg as the greatest round ever played in women's competitive golf. It included 10 pars, 8

birdies, and required only 23 putts.

Miss Jameson won the 1937 Trans-Mississippi while she was a high school senior. She won the USGA Women's National Amateur in 1939, 1940 and 1942. She also won the Women's Open in 1947. She won the Women's Western Open in 1942 and 1954. In 1952 she won George S. May's World's Women's championship.

INDOOR OUTDOOR PRACTICE MAT

The manufacturers of the new Turf King combination mat report lively interest and sales among the country's golf clubs and driving ranges. Ideal for both indoor and outdoor practice of both wood

and iron shots, this mat is built to take it without causing damage to clubs. Additional details may be had by writing Flexi-Mat Corp., 2249 S. Calumet Ave., Chicago 16, or consulting ad in this issue.

BAILEY AND IZETT HAVE PLASTIC INSERT IN CLUBS

Custom-made clubs having a laminated plastic insert have been designed and introduced by Bailey & Izett, 2538 Haverford Road, Ardmore, Pa. The face of each wood is fitted with an insert of resilient Synthane thermosetting laminated plastic.

Greater yardage is achieved, Bailey and Izett say, because the modulus of elasticity of the special-grade Synthane insert is close to that of the average golf ball. The Synthane insert is impact- and splinter-resistant, as well as dimensionally stable; an important consideration where extremes of heat and dampness can cause shrinkage or swelling with subsequent damage to the face.

Woods from No. 1 to No. 9 are available in two models; the average sized model 120 and the 440 model with a deeper face for low handicap players.

For men, women and juniors, George Izett custom made clubs are sold pro only.

John Riolo, 2017 E. St., Sacramento, Calif., has a copyrighted self-adjusting handicap system that is being used with satisfaction by clubs in Northern California. The system and its operation are described in a booklet, price of which is \$2.

**NADCO PRESENTS "HOLE-IN-ONE"
CONTEST PROMOTION PACKAGE**

"Pros are reporting lively interest in the big, annual Nadco Hole-In-One Contest," says William C. King, Gen. Sales Mgr. of Nadco Sporting Goods Co., 3635 W. Touhy Ave., Chicago 45, Ill.

First prize is to be a Cadillac. This will be awarded to the winner of the play-off at the end of September when a nationally prominent professional will drive off the marked balls (designating qualified "hole-in-one" contestants) to a par three (3) hole at a well known course.

Any owner of a Nadco golf product—cart or seat cane—is eligible.

The promotion is being backed by powerful national advertising plus a hard-hitting promotion package of free colorful, eye-catching window streamers, ad mats, easel counter cards, novel golf score card give-aways, envelope stuffers, contest rule cards and radio spot announcements.

U. S. RUBBER MAKES REVOLTA RAINJACKET

United States Rubber Co. now is making a lightweight rainjacket designed by Johnny Revolta. The jacket is made of plastic film in small, medium, large and extra large sizes and when not in use may be folded compactly and carried in the golf bag.

Saf-T-Klenz

**KEEPS
SHOWERS
AND POOLS
SPARKLING
CLEAN**

An Easy Way!

Removes lime deposits, algae formations, body grease and soap oil even where hard scrubbing with other cleaners failed. The most formidable stains and rust disappear like magic. Simply sprinkle a little Saf-T-Klenz powder on the damp surface, mop lightly, and rinse with clear water. Minimizes conditions that breed and spread infectious germs. Leaves floors and decks practically slip-proof. Odorless, it doesn't mask odors—it removes the cause. Harmless to hands, clothing, floors and drains. Safe to use on glass, porcelain, china, marble, tile, terrazzo, vitreous and concrete surfaces. Porcelain drinking fountains, wash bowls, toilets, and urinals are similarly cleaned with little effort. Ideal for brass, bronze or copper. Sold with a positive guarantee of satisfaction or cancellation of invoice. It is not even necessary to return the unused portion. Write for folder and prices today.

"SWING GAUGE" TO AID PUTT, APPROACH PRECISION

"Putt-O-Graph" a light rustproof metal device with a movable indicator, was invented by Andrew T. Rolfe, of the Golf Research Institute, Country Road, Westport, Conn.

This practice device is used by placing it in line with the putt then adjusting the movable indicator so the face of the putter or approach club face can be kept squarely across the arc of the swing.

The inventor is a prominent public relations man whose bad putting was discouraging him with golf. He worked on this gimmick for a couple of years and got it to its present stage where it has him averaging 31 putts a round. A number of professionals are using the Putt-O-Graph in their teaching, and are selling it to members.

MACGREGOR ADDS NEW KID CLUBS; NEW SAND IRON

MacGregor Golf has revamped its line of Jack Burke, Jr. woods and irons and has added a completely new model, called the Apprentice. Burke models are duplicates of MacGregor's top men's woods, proportionately reduced in size for youngsters between ages of 11 and 14. The Apprentice model is also styled along the lines of adult clubs, but finished in weights and lengths suitable for young golfers between the ages of 7 and 10.

A shorter than standard golf bag, especially designed for the "Apprentice Model" Junior golf clubs is also available.

MacGregor also has an all-new MT sand iron with a wider sole and a Colokrom face. Back part of the sole is higher than the front.

The company has added to its line a Lew Worsham, Jr. putter. This is a modernized mallet head aluminum putter with a brass weighting which covers the sole and serves as an attractive face insert. The putter has a True Temper chrome shaft and a "pistol" grip.

CAMPBELL ADDS GRO-GREEN PLANT IN IOWA

Farm Products Div. of H. D. Campbell Co., Rochelle, Ill., plans to install a liquid fertilizer manufacturing plant for direct soil application formulations at Strawberry Point, Ia.

Campbell's Gro-Green concentrates manufactured at Rochelle, Ill., have grown to national proportions in less than three years and are now sold from coast to coast.

Wm. Cannon, mgr. of Campbell's Farm Hatcheries, will also be in charge of the fertilizer formulation setup.

Several other processing locations are under consideration for similar plant installations in other states.

WALDRON INSECT REPELLENT FOR GOLFERS' USE

Lew Waldron, former professional, who has built a very successful chemical business, now has an insect repellent which made good with golfers in extensive tests last summer. The Waldron repellent now is being marketed nationally by Columbia Chemical Co., 154 E. Erie St., Chicago 11, Ill.

The material, a liquid, is sprayed on hands and rubbed over face, neck and legs. It repels mosquitoes, chiggers, gnats and flies.

It comes in a compression can for handy application and is for pro shop sale at a moderate price. Waldron will be glad to supply further details to pros, on request.

Among recent foreign purchasers of West Point Products Corp. Aerifier is the Tokyo (Japan) GC.

SLIP-PROOF POOL MATS NOW MADE BY AMERICAN MAT

Accidents resulting from slipping on wet swimming pool decks can now be largely prevented by a new rubber runner mat known as Do-All.

This matting is 3/16 in. thick with 1 1/2 in. wide ribs which run parallel to the length, separated by 1/2 in. and 1/8 in. depth recesses. It is available in black, red, green, blue and mosaic, 23 in. wide in rolls 50 ft. long, and 34 in. wide by 38 ft. long. Sides and edges are beveled.

Free literature and price information will be supplied by American Mat Corp., 1802 Adams Street, Toledo 2, O.

ANTI-TANGLE DEVICE ON BRITTEN TRIMMER-EDGERS

Overheating and premature motor failure associated with conventional electric edgers and trimmers, caused by grass and weeds being wrapped into the motor shaft when cutting long and heavy growths, are eliminated in "Trim Master" and "Bantam" Trimmer-Edgers manufactured by E. F. Britten and Co., Inc., of Cranford, N. J.

A patented anti-tangle device, operating on the scissors principle with a fixed blade on the motor support and a revolving blade on the motor shaft, severs and minces the long strands before they can be wrapped into the shaft. Tangling of grass around the motor shaft is eliminated by this exclusive device, reducing motor drag and resulting in longer service life.

Trimmers are converted to power edgers quickly and easily by merely adjusting the tubular aluminum handle. A hardened steel edging guide rides on the sidewalk, curb or other flat surface and guides the tool for making precision edges.

ANNOUNCE WINNERS OF FURGOL-McGREGOR SPORTSWEAR CONTEST

The six winners who came closest to National Open Champion Ed Furgol's score in the Masters' Tournament—and who, in return, "won" Furgol for a day, have been announced by McGregor Sportswear, sponsors of the contest.

The Contest which closed two days before the Masters', offered as its principal prize a visit by Furgol to the winner's home course for a day's round of golf with instruction.

The six regional winners:

John F. Lavelle, 330 Douglas Street, Syracuse, N. Y., who plays at the Tecumseh GC; Douglas Cohn, 14, 113 South 68th Avenue, Omaha, Neb.; A. M. Briggs, 1200 S. Federal St., Denver, Colo., who plays at Cherry Hills CC; H. D. Merriam, 2901 Lenox Road, Atlanta, Ga., who plays at Ainsley; Charles H. Hopkins, 3029 Reuter Ave., Waco, Tex., who plays at the municipal course, and Joseph M. Raffin, 308 N. Meadow St., Richmond, Va.

DON TAIT TELLS ABOUT SPALDING SPECIAL ORDERS

Don Tait is a sports specialist—a golf club expert who has been handling, for

years, the orders of such celebrities as President Eisenhower and Bing Crosby and who even has devised clubs for polio victims.

"The President," says Tait who works in the A. G. Spalding plant at Chicopee, Mass., "like grips that are larger than regular. He prefers a small amount of hook on the face of the woods. He likes Bobby Jones clubs."

Bing Crosby uses 46-in. woods.

"That's longer than ordinary and started a trend," says Tait, "but I remember that we used to make clubs 50 in. long for Primo Carnera. And we manufacture clubs all the way down to 30 in. long for children just starting out.

Eight-year-old Judy Torluemke of St. Louis, a recent Pee Wee champion, was in the latter category.

Clubs with extremely large grips are made for people with arthritis, the shapes being altered in various ways for crippled golfers. One of the strangest demands which Tait ever received at Chicopee was for clubs which could be used while sitting down.

"That was for demonstration work," says Tait.

Trick shot star Joe Kirkwood would order a shaft made of lead tubing that

GREATER DISTANCE... DOESN'T PUDDLE

O M Scott & SONS CO., Marysville, Ohio

wrapped around his neck, Tait relates.

"A lot of golfers probably feel that way themselves on occasion," says Tait, a Springfield, Mass., native.

Professionals such as Gene Littler, Bud Holscher, Shelley Mayfield, et al all pre-

Don Tait (R) supervises special order as Bill Duncan sees everything is perfect to smallest degree.

fer greater stiffness in the shaft of their clubs than do players who perform less often, observes Tait.

"Usually the playing pros are fighting a hook all the time and need stiffness for better control," Tait says.

A difficult case for Tait was that of a polio victim who had never played golf before but whose doctor suggested the sport for its many values.

"He had no strength in the fingers of his left hand and very little in his right hand," recalls Tait, "so we recommended that he play left-handed. To avoid his losing his grip with his left hand, we sewed a glove to the grip to hold his hand in."

The result? The player recently wrote to Tait, asking for more clubs.

About 50,000 special order clubs a year are made by Spalding, according to Tait. Length, grip sizes and changes in lie and loft are among the most usual demands. A special order requires about four or five weeks for completion, says Tait.

One recent order he remembers vividly was for a complete set of irons all marked No. 8, as per request.

"This guy got tired of being asked what he had used for a shot," says Don, "so he replied No. 8 to everything and took out an iron marked No. 8 to prove it."

PUNCH-LOK HOSE CLAMPS GET BIG USE IN GOLF

Punch-Lok, extensively used in industry for making quick, leakproof repairs to hose, is becoming standard equipment in golf course maintenance buildings.

The Punch-Lok method consists of double-wrapping a broad, flat band of durable, high-tensile material around the

KOZAR'S KIDS INSPIRE NEW PWEЕ CLUB LINE

Donna, 11, and Martha, 9, (left and right, above) daughters of Mike Kozar, head of Kozar's Golf Development Laboratory, Cuyahoga Falls, O., inspired their daddy and his staff to design and build a new line of woods and irons for kids from 3 to 16. The Kozar youngsters are excellent golfers. Martha came in 4th in the 1954 National Pwee tournament. Mike got True Temper to make a special shaft for the Pwee clubs, and had Flexi-Grip make molded grips especially for the juniors. Harry Hasmer of Kozar's iron head division worked out the special heads for the clubs. Production has started on the Pwee line.

"COLT" NEW PRO-ONLY GOLF BALL MAKES ITS DEBUT

Colt Golf, 161 E. 37th St., New York 15, N. Y., reports promising sales performance for its brand new "Colt" golf ball judging from its fast get-away in the New York metropolitan area where its introductory distribution was launched last month.

The new liquid center "Colt," wound with one continuous strand of rubber thread, responds to the whip for those

who want distance, yet is calm and true on the greens, according to the makers. The lasting whiteness of its durable cover material is the result of persistent research and testing. The ball will retail at the usual price of top quality pro-only golf balls. More complete details from company at address above.

PLASTIC TILE STANDS SPIKES

Ray Wagman, now mgr., Racine (Wis.) CC, is at right with a square of Vinylast tile, made by Vinyl Plastics, Inc., Sheboygan, Wis., that was installed six years ago in clubhouse at Pine Hills CC, Sheboygan, when Wagman was mgr. Tile shows no signs of spike wear despite heavy traffic.

At the left is Robert E. Kohler, former Pine Hills president and head of Vinyl Plastics.

Oldest installation of the floor covering is at Riverdale CC, near Sheboygan, where the veteran Freddie Thiel is operator. Thiel installed the material as grill room flooring in 1948, and the next year installed it throughout the clubhouse and in the pro shop.

WILSON TELLS FEATURES OF NEW TURFRIDER CART

The all-new Wilson Sporting Goods Co. Turfrider caddy cart has a single operating lock and opening mechanism which makes opening and closing simple and quick. When folded, the Turfrider stands upright and the wheels fold down—enabling the cart to be rolled in this position with finger tip effort.

Featuring a center bar of chrome plated steel and 12-in. aluminum die-cast wheels, the Turfrider maintains a low center of gravity which keeps it balanced smoothly even on rough ground. It has semi-pneumatic airplane type tires with a new smooth tread to prevent dirt-catching.

Wilson has installed a patented adjustable handle which extends for pulling.

All sizes and shapes of golf bags can fit the new lightweight Wilson cart because of new types of expandable brack-
