BRINGS BACK TURF "ALIVE"

in spite of bad weather

One of the beautiful greens at Oxford Country Club, Chicopee Falls, Mass. Leon V. St. Pierre, Supt., of that well-known Club, says:

"Agrico Holds Color Best!"

Leon V. St. Pierre, Supt., of Oxford Country Club, Mass.

It's a good plan to get your turf back in shape *fast*, by using Agrico. Mr. St. Pierre writes:

"My greens have been better this year than ever before . . . I give credit to the fact that I have followed the Agrico feeding program carefully, including the application of Agrico Country

Club Fertilizer with the proportioner thru the Summer. This is definitely the answer for warm weather feeding.

"In the past, I've tried other fertilizers but none have held color like Agrico. This year I decided to stay with Agrico all the way—it has really paid off!"

ORDER AGRICO NOW . . . and be sure to try AGRINITE, the 100% Natural Organic Fertilizer. See your regular supplier, or write to The AMERICAN AGRICULTURAL CHEMICAL Co., 50 Church St., New York 7, N. Y.

Photo of actual test at Toro Research and Development Center.

TORO TESTS THE WHIRLWIND in a tornado of dust and dirt!

Power mowers run themselves ragged around a circular track at the Toro Research and Development Center. And to give these test machines a real workout, Toro engineers have made the going as "rough" as they can make it.

One section of this circular proving ground is a ditch of fine, loose dirt that turns up thick, heavy clouds of dust when a Whirlwind passes by. Plenty of that dust settles on the mower, and on the engine, too. Then the engineers, anxious to make the mower age years in a matter of hours, give the machine a good hosing down—every time it comes

around the track. Dirt washes down inside and grinds away on the moving parts. Trouble spots show up faster with treatment like that.

This is just one of the many tough tests given Toro mowing machinery before it reaches the production-line stage. This is just one example of what goes *into* Toro machines to make sure you get more *out* of them.

See your Toro distributor soon. He's got big news for you about the new Toro line.

AMAZING NEW LAWN FOOD FOR GOLF COURSES . . .

made so it
**won't burn
grass**

when used in recommended amounts!

- Longest-lasting, most complete food for turf ever developed—opens a whole new era of deep-rooted, velvety beauty for both your greens and fairways.
- No watering-in or special care required—and far more economical because it yields its nutrients slowly and does not draw water from turf.
- Exhaustively plot-tested, under all conditions, all over the country, to nourish any grass as well as all the Bents.

One of the fine courses piped with Cast Iron

Irrigating
fairway of
Bay Course

A sound plan for golf course irrigation is based on a piping system whose first cost is the last cost. Install cast iron pipe and there will be no replacements and little maintenance expense. Cast iron pipe lasts for a century. It is the standard material for underground mains. Sizes from 2 inches. Address inquiries to Cast Iron Pipe Research Association, Thomas F. Wolfe, Managing Director, Peoples Gas Building, Chicago, Illinois.
