Take one look! Hit one shot!

Here's new plus-power you can train in with gun barrel accuracy. Here's a new Fluid Feel unlike anything you've ever known. Here's an iron lighter in over-all weight yet with more "head feel" which permits better hand action.

Wilson Dyna-Powered Irons the new magic wands of golf

There's never been an iron like this! By drilling through the neck and inserting the shaft all the way through to the sole, we have by far the strongest union of head and shaft ever devised. And in removing unnecessary weight from the neck and redistributing it throughout the blade, we've produced a more delicate balance.

The results to you? Virtually no vibration up the shaft. No head shimmy. No quitting at the moment of contact. An iron you can swing faster without swinging harder. An iron you can time better. Greater

club-head speed, greater distance, greater accuracy and a magnificent new Fluid Feel.

But don't take our word. Discover the Dyna-Powered difference firsthand, the next time your Wilson salesman calls.
