in the laboratory  
produced this New  
1957 Wilson Staff

- A brand new thin-wall all-liquid center with famous X2F additive that produces an energized center for "crisp-quick" response when club meets ball.
- A brand new process of rubber vulcanization produces a new rubber thread of high resilience resulting in tighter compression, outstanding feature of this golf ball.
- A brand new compounding of the balata cover stock produces better control and feel.
- A brand new compounding of paint produces a white and glossy ball that stays white longer than any ball ever developed.
- A brand new method of stamping produces a ball of distinctive appearance. Stamped 1 through 12 for easy identification.

The new '57 Wilson Staff has time-tested construction to give you a ball that lasts long, hits well, and looks good after lots of play. The Staff, from the core . . . through the winding . . . to the cover . . . is a brand new ball. The 1957 Staff was Cary Middlecoff's National Open ball . . . it can win for you, too!
