

What's Better

About The Jacobsen Greens Mower?

When Jacobsen produced the first Power Greens Mower ever made, the experts said it couldn't be done. Today it is the accepted standard of quality and performance among Golf Course Superintendents.

Here are a few of the many reasons why:

- A heavily reinforced cast-frame chassis, to insure rigidity, accurate cutting adjustment and uniform cutting.
- Beautifully balanced design, with balance point in the center, for smooth cutting, easy control.
- Completely chain driven, assuring no reel slippage.
- The incomparable Jacobsen Hi-Torque engine, mounted horizontally for low center of gravity. Quick starting, smooth running, requiring a minimum of upkeep.

Many more reasons can be proved on demonstration.

Styling of Jacobsen Products by Waltman Associates of Chicago.

"Blue Chip" NITROFORM® Found Ideal For Fertilizer Mixes

Rhode Island University Presents a Study on Urea-Form Fertilizer Compositions

On February 2nd, 1957 before a group of New England agronomists, Rhode Island University presented data which resolved one of the most controversial subjects since urea-forms were commercially introduced to the market a few years ago. Nitroform has always suggested the use of their urea-form in fertilizer formulas if the user were to obtain the highest benefit from his U-F applications. The benefits of single season applications would be greatly reduced if the potential user were forced to make applications of phosphate and potash following the nitrogen. Again it has been shown that various sources of nitrogen greatly improved the working qualities and nitrification characteristics of urea-form. Work conducted at Rhode Island University under the direction of Dr. Jesse DeFrance proves conclusively that urea-forms are both practical and desirable in fertilizer formulas.

KEEP YOUR GREENS GREEN WITH ACTI-DIONE*

the tested antibiotic turf fungicide

Large brown patch, fading-out, melting-out, dollar spot, Pythium can all become a thing of the past. You can wipe out the turfgrass fungus disease and keep your greens in perfect-play condition with regular applications of ACTI-DIONE. Extensive field tests prove that ACTI-DIONE rapidly destroys the fungi that damage turf. Control of disease is often obtained within hours of the first application.

ACTI-DIONE is simple to prepare, easy to use, and economical too. Every drop of the solution controls and protects.

Available in two forms:
ACTI-DIONE Ferrated—outstandingly effective against dollar spot, melting-out, and fading-out. Investigational studies indicate that Acti-dione Ferrated may control Leaf Spot of Kentucky bluegrass, as well as Rust and Powdery Mildew of Merion bluegrass. ACTI-DIONE RZ**—especially effective against large brown patch and Pythium . . . also controls dollar spot, melting-out, and fading-out. When used on a regular preventive schedule, one package will protect 20,000 sq. ft. of turf.

Both products can be obtained from golf course maintenance and supply stores.
