

Linck's Walking Sprayer Model Is Improved

A new, improved model of the Linck Lawn Sprayer is now available to dealers as a sale or rental item. Said to be the most accurate method ever devised for applying liquid chemicals, the tubular-frame model sprays 1,000 sq. ft. per gal. in as little as 3 minutes. Delivery is constant at normal walking speed. It features a 24 in. vertical spray pattern which affords greater penetration. Since it operates on a one-wheel drive with patented hose pump, the sprayer is ideal for spot spraying, close work around trees and shrubs and for covering large areas. Direction chart for rappingly various chemicals appears on the 2-gal. tank.

As a special promotion, the sprayer is being made available to qualified dealers free of charge on a loan basis. Write O. E. Linck Co., Inc., Clifton, N. J.

Aquatrols Corp. Announces New Distributors

Robert A Moore, vp of Aquatrols Corp. of America, makers of the non-ionic wetting agent, Aqua-Gro, has announced 14 new distributors for his product: Joseph Herberger, Oregon City, Ore.; Robison's Lawn and Golf Supply, Kansas City, Mo.; Shade Tree Service, Decatur, Ill.; Baron Chemical Co., El Paso, Tex.; Kenney Machinery Co., Indianapolis; John P. Skinner Company, Mantua, O.; A. Stuart Baker, Dayton, O.; Lawn and Golf Supply Co., Jacksonville, Fla.; Barco Inc., Lake Worth, Fla.; Rochester Fertilizer Co., Rochester, N. Y.; Vaughan Seed Co., New York, N. Y.; H. B. Davis Co., Albany, N. Y.; Doggett-Pfeil Co. of New York, Glen Head, L. I., N. Y.; Jack Mansur, Fryburg, Me.

Bill Lyons' Nimisila Bent Now on Market

Several supts. have raised the new, course-tested Nimisila bent grass strain developed by Bill Lyons at his Turfgrass Farms, 1843 Glenmount ave., Akron 19, O. New, fresh stock is annually available and Lyons is booking for fall delivery. Some of Nimisila's features are: It gives an excellent putting surface and is said to have high resistance to disease and low nitrogen requirement. It's also claimed to require minimum water, is weed resistant and will withstand heavy traffic.

NITROFORM provides plants with "working capital" in the form of "long-term investments" which are converted slowly and uniformly into "available assets."

This rugged Foot-Joy golf shoe is one of the new styles for 1958 introduced by Field and Flint Co., Brackton, Mass. Featuring double sole and water-proof construction, the model is designed for comfort and playing balance on the roughest golf course terrain. Made of selected imported veal leather on an Aintree last, this tan, plain-toe blucher (Style 5516) by Foot-Joy is available at pro shops.

**Lynde & Rowsey Offers
Unique Turf Service**

Lynde & Rowsey Lawn Grass Nurseries, 402 Commercial National, Muskogee, Okla., offers complete turf planting service for courses, parks and large recreation areas. Certified Bermudas are planted in fairways, for example, through a packaged service without plowing of the areas or loss in play. All work is done on a contract basis. The company offers to make a complete proposal for the consideration of any club that makes application to its Muskogee headquarters.

**Toro Goes All-Out
in '58 Ad Drive**

Toro Manufacturing Corp., Minneapolis, is conducting its largest consumer and trade ad and sales promotion campaign this year. More than \$500,000 has been budgeted for advertising expenditures, an increase of 25 per cent over last year, and ten times what it was in 1948. The ads will stress Toro products, the company's research and development center and nationwide network of service stations.

**Spalding Adds Three Men
to Advisory Staff**

Spalding has added one of the great international players, a former U. S. Open champion, and one of the more promising younger stars to its golf consultant list. Roberto de Vicenzo,

One application of **NITROFORM** a year will feed turf more uniformly than ten applications of quickly-available sources of nitrogen.

Argentina and Mexico City; Jack Fleck, who defeated Ben Hogan in the play-off for the 1955 Open honors; and Bob Goalby, long-hitting, 26-year old Belleville, Ill. hopeful are the new Spalding stars.

Acushnet Announces Big New Ad Campaign

Beginning with the 1958 March issues of national and golf magazines, Acushnet launched the greatest consumer advertising campaign in its history. To carry the torch for Acushnet, the well remembered and well beloved Fussy Foursome, absent from Acushnet's advertising for several years, has been recalled to duty.

The return of these zany characters to Acushnet advertising is, in a sense, by popular request. Ever since their retirement some years ago, Acushnet has been bombarded with requests for reprints for framing. Acushnet and its ad agency reasoned that as the popularity of these effective salesmen had survived several years of absence, they should be brought back. Every month during the spring and summer Acushnet ads will be going into over 10,500,000 homes.

In 1917, for the 10th anniversary of our professional and amateur players fitted in the major tournaments, there was only one ball.

Today, the all-weather ball is sold through golf courses for \$1.00.

Penna Concentrates on Research, Design at MacGregor

Toney Penna, one of the world's foremost golf club designers, is stepping into new responsibilities with The MacGregor Co., Cincinnati, O. He will head all research, development and design of the firm's line of golf equipment. A MacGregor man for 25 years as salesman, tournament rep and club designer, Toney now will devote all of his time to his new duties. By relinquishing his former promotional activities to concentrate full time on product work, his contributions to the improvement of golf equipment should be even greater in the future. Most prominent of the clubs he has designed are "MT" irons and "Super Eye-O-Matic" woods. He also is known for design of utility irons, notably the "Double Duty" and "Double Service." In 1955 he introduced the "Colokrom" iron - two-tone copper and chrome face - which was an immediate success.

DISTRESS SALE — Reconditioned electric Power Cars with chargers! 24-volt Power Cars in A-1 running order only \$398 f.o.b. San Diego. New batteries \$72 extra. Write Ad 416 c/o Golfdom.

Washington Physicist Invents Strobe Golf Trainer

Prof. Luis W. Alvarez, Washington, D. C. physicist, has patented a stroboscopic golf training device. A stroboscope is an instrument for studying interrupted light. In Alvarez' device, bright flashes illuminate the clubhead at four or five points as it approaches and strikes the ball. In looking down at the ball the player sees a series of "positionally arrested images" at these points. The images tell the player whether he has the club face at the proper angle. By repeating his swing, he may be able to correct tendencies to slice, hook or top the ball. A ball may or may not be used with the strobe trainer.

Also attached to the trainer is a timing device that measures speed of the swing and indicates the distance an imaginary ball would travel.

Southern Turf Officers

All officers of the Southern Turfgrass Assn. were re-elected at a recent conference held in Memphis. They are: Jim Hamner, Jr., pres; Harold Eller, vp; and Reg Perry, secy.-treas. Directors are E. Winfield, Al Rayford, E. J. Sears, Lou Vickers, Nelson Giddens and George C. Curtis.
