Belt Brod-Kastor Gives Uniform Spread

A broadcast fertilizer distributor which spreads pelleted and granular fertilizers in swaths up to 40 feet wide has been introduced by The Belt Corp., Orient, Ohio. It is reported that the fairways of an average 18-hole course can be fertilized in 4 hours with the distributor. The Belt Brod-Kastor spreads the fertilizer in a controlled, uniform pattern, greatly reducing hazards of burning and striping resulting from improper application. Mounted on its own undercarriage or trailer, and with a hopper capacity of approximately 1400 lbs., the Brod-Kastor can be easily loaded since its hopper height is only four ft. from the ground. The Brod-Kastor can be powered from the PTO of standard tractors or, equipped with its own gasoline engine, can be pulled by a jeep, pickup truck or small tractor.

Outstanding Advances Claimed for Spalding's 1959 Clubs

What are said to be outstanding advances in golf manufacture distinguish Spalding's registered 1959 models, Synchro-Dyned, Hydrosealed woods and in the "Perma-Finish" irons. The new Hydrosealed woods and "Perma-Finish" irons are available in the Top-Flite and Gene Littler "Pro Model" registered clubs.

In the Hydrosealed woods there are new overall design of heads, new nylon face inserts and new super sole plates. These features have been added to the "Synchro-Dyned" Spalding exclusive, a process by which heads, shafts and grips are coordinated by exacting formula to give synchronized action and perfect matching of each club of the set. Spalding's new "Perma-Finish" irons not only have a beautiful chrome finish but three platings which render the clubs more durable and more nick resistant.

International Harvester's Cub Lo-Boy is especially built to handle numerous jobs around a country club. Shown pulling a three-gang Roseman, the Lo-Boy has exceptional stability and maneuverability. Being only 55-ins. to the top of the steering wheel, the tractor gets under low branches and into near-inaccessible areas with comparative ease. The tractor can be equipped with front-mounted snow removal blade.

Architectural Consulting Service

David K. Kent, who worked for his father and several other well known architects, as well as supts., for 30 years, now has a golf course consultants office at 8535 Melvin ave., Northridge, Calif. A graduate civil engineer, Kent says that his plans for courses are precisely engineered for each individual project, eliminating any chance of expensive extras. In green design, he uses scale models for each and every green, thus precluding the need for re-design on the site. Besides design, Kent and his associates have set up a service to assist established courses in maintaining their facilities.

Viscount Is Latest Jacobsen Addition

Jacobsen Manufacturing Co., Racine, Wis., has added another all new power-propelled mower to its 1959 line. It is a 22-in. model, called the Viscount, and has an enclosed rear wheel drive and the exclusive Turbo-cut suction lift disc to give superior cutting performance. A new aerodynamic "discharge control" grass chamber is another feature of the machine. The Model 81 Viscount has a non-sag handle that won't catch on shrubs or clothing.
