Mallinckrodt Chart Ready

"Turf Fungicide Application Chart" for 1959 is now available from Mallinckrodt Chemical Works, Mallinckrodt st., St. Louis 7, Mo. It is suggested that it be tacked over the supt's 1958 chart so that he will have a detailed history of applications. These advantages are cited in keeping a record of fungicide applications: It gives a simple formula for measuring greens; The timetable pinpoints periods of disease activity; Blanks for each day of the year make record keeping easy.

Full color reprints of Winged Foot and others in the Open series can be obtained by writing to MacGregor.

LeRoy Cast Drum Rollers

Cast drum rollers, made by LeRoy Mfg. Co., Doylestown, Pa., do not require liquid for added weight and give proper compaction without weight shifting. All drums are standard 18-ins. wide with 21-in. diameter. They are cast in one part and have rounded edges to eliminate scalping. The drums have braced steel angle frames to prevent twisting, one piece axles and Arguto hardwood oilless bearings. Rolling widths are 6 ft. to 12½ ft. Single gang units also are available in 4-in. "U" channel wraparound frame design in 6-, 9- and 10½-ft. rolling widths.

Agronomists Okay Ripple Soles

A report written by Marvin H. Ferguson, research dir. for the USGA green section, from information supplied by C. E. Gipson and R. K. Potts, Texas A & M agronomists, indicates that ripple sole golf shoes do very little damage to greens. Ripple sole footprints produce no appreciable effect upon a rolling ball, nor do they deflect a ball to any great extent. The upshot, according to Leonard Hack, pres. of Ripple Sole Corp., 537 Mutual Bldg., Detroit 26, is that there is no basis for discriminating against Ripple Sole shoes.
