### Kroydon's Thunderbolt Improved in Several Ways

Kroydon's 1959 Thunderbolt golf ball is made with a liquid center and with thin wall.

The patch which formerly sealed the liquid center has been eliminated. This, the manufacturer says, has strengthened the ball with fewer chances of leaks. It also has resulted in a rounder wind, more uniform and with higher compression. Thread in the Thunderbolt has been increased from 88 ft. to 122 ft., the latter being stretched nine times its length. Kroydon Corp. is located in Melrose Park, Ill.

### Mopper Suggested for Lockerroom, Pool-Side

Mopper, a terry-cloth robe, made by Woodmere Mills, Inc., Dept. 327, Bennington, Vt., is suggested for use in the lockerroom or at the pool-side. It is made of thick, snow-white Cannon terry with raglan sleeves and wrap-around belt. The robe also has two carry-all pockets and free, press-on initials for personalizing. It is recommended for either men or women and comes in a clear plastic, wet proof bag. Pro inquiries are invited.

### Comptometer Corp. Acquires Burke Golf Company

A. E. Carlson, pres. of Comptometer Corp., Chicago, has announced acquisition of Burke Golf Co., Newark, O., for an undisclosed amount of Comptometer common stock. Jack A. Schram and William D. Schaffner will continue to manage the Burke Golf Div. of Comptometer and all Burke personnel will be retained. Burke, established in 1910, is the oldest exclusive manufacturers of golf clubs in the U. S.

Totally new outdoor floods, designed for locations where concentrated, high intensity light is required, have been announced by Stonco Electric Products Co., 333 Monroe ave., Kenilworth, N. J.

### New Worthington Mower Has Variable Gang Control

Worthington Mower Co., Stroudsburg, Pa., has introduced a new Model F tractor equipped with a variable-capacity gang mower control. Called

the Wing Lift, it has a lifting mechanism to raise and lower a 5-gang unit. The control permits the cutting swath to be varied from the basic 3-gang (6 ft., 10 ins.) to the full 7-gang (15 ft.). As on all Model F's with front wheel drive and rear wheel steer, all cutting units are mounted ahead of power unit wheels to eliminate streaks. Wing units are raised and lowered hydraulically. The new combination is available with either Fairway or Blitzer units. The Wing Lift is the result of six years of development and testing by Worthington.

### Wall's Victory Streak Big Boon to Golfcraft

Basic material for Glasshaft clubs, designed by Lloyd Mangrum and manufactured by Golfcraft, Inc., Escondido, Calif., is supplied by Owens-Corning Fiberglas Corp., Toledo, O. Shafts are made from fibrous glass yarn woven into glass cloth. They caught on in a big hurry in 1957 when Dick Mayer used them to win the Open. More recently, Art Wall's success with a Glasshaft putter has converted many more golfers to using Golfcraft clubs.

### March Record Month for Toro Manufacturing

A record breaking \$3,654,000 shipment of power mowers was made in March by Toro Manufacturing Corp., Minneapolis, according to R. W. Gibson, vp in charge of sales and advertising. The previous high for any month was \$2,787,000, recorded in Mar., 1956. Gibson attributed the increased orders to the appeal of Toro's new Whirlwind "wind tunnel" rotaries, orders for which are 50% ahead of last year's rotary line. Toro's new riding machine, the Sportsman, also contributed to the record.

Roseman Mower Corp., Evanston, Ill., has introduced a 5-gang, lift-type, fold-back mower that, it is said, can reduce mowing costs by 50 per cent. Called the Park Challenger, it cuts an 11 ft., 2-in. swath and fits most tractors. The mower is lifted by the tractor hydraulic system and folds back to an overall 8 ft. width for travel between job sites. The two outer mowers can be quickly disconnected for close area cutting. Most existing 3-gang Roseman Challengers can be converted to the new 5-gang model.
