

COMPARE maintenance costs!

and you'll buy ROSEMAN GANG MOWERS - - - -
Every Time

Why Roseman

High mowing costs, wasted man hours and excessive repair bills are not found in gang mowers of Roseman design and quality.

Save on Repairs

Exclusive non-breakable malleable side frames and bed knife shoes. Tough chrome-nickel alloy steel heavy duty reels with riveted blades—not welded—to avoid hard spots and breakage. Timken adjustable bearings. Vanadium steel bed knives. All assure faithful service for many years with almost non-existent repair bills.

Save on Labor

Exclusive ability of Roseman hollow-roller-drive gang mowers to overhang traps and shrubbery beds and cut close to fences and structures eliminates the need for much hand trimming. Hundreds of man hours can be saved or devoted to other tasks.

Save on Time

Roseman mowers are rear drive mowers. They mow faster, more uniformly without kicking up the rear. Faster mowing with considerable savings in time and man hours are the result. To say nothing of smoother cut fairways.

Save on Equipment

Roseman mowers, with combination rough and fairway hitch can be used to mow areas quickly and at less cost. No need for the smaller club to buy an additional gang of rough mowers. Just flip the mowers into high cutting position. Also useful where grass on rain flooded fairways "gets away."

Compare 'em all

You are invited to compare the Roseman mower with any other mower. Be sure and compare Roseman quality, design features, low upkeep costs, and performance. We believe that you, too, will join the swing to Roseman mowers.

25 Min. Versus 4 Hours

Which Do You Choose?

When you're ready to aerify your greens, how much time do you want it to take per green? 25 minutes or 4 hours?

Of course, you want the job to be completed in a few minutes. Fact is, you NEED to have the job done quickly. There just isn't time to spend hours instead of minutes on this all-important part of turfgrass management.

The 5-in-1 Turfgrass Tool

This year golf course superintendents are purchasing West Point's JR model Aerifier in record amounts. They like its speed on the green and between the greens. They also like its ability to be FIVE different turfgrass tools through the use of these West Point attachments: (1) Standard Aerifier Reel, (2) SUPER REEL, (3) Aeri-Spike, (4) Roller and (5) Aeri-Punch. Consider all the points in favor of the JR and draw your own conclusions. We're sure that you'll then get in touch with your West Point Products distributor.

the filming to win the US Open and PGA title . . . Bobby Locke and Snead playing for TV in Oct.

Eddie Hruz, owner-pro-mgr., Marshfield (Wis.) CC has bought Chilton (Wis.) CC . . . Eddie is on his way to being a golf magnate . . . There are at least nine professionals who own courses with earnings that are higher than the top tournament player's annual income.

Ladies PGA members get TV deal proposals involving \$500 cash per girl for signing . . . Bright young ladies say they want to see the money in cash instead of sharing a beautiful dream with promoters . . . Men pros who haven't seen Ladies PGA tournaments for a couple of years will be tremendously impressed by the smart looks of the girl pros . . . They ought to make a good-looking, interesting TV show.

Bob Hudson, Portland (Ore.) food magnate and international pro golf angel, will spend \$30,000 being host to British PGA team playing in this fall's Ryder Cup matches, says Bob's pal, Henry Cotton, in Golf Illustrated of London . . . Hudson is a British PGA vp . . . Dai Rees who was captain of the British Ryder Cup team, which won in 1957, and of the losing

HIRAM F. GODWIN & SON

22346 Grand River Ave. Detroit 19, Mich.

The beautiful Lakeside Golf Course, Burbank, Cal. has Transite Pipe throughout its irrigation system.

Transite cuts irrigation costs 5 ways ... keeps courses greener, too!

For all its quality and dependability, Johns-Manville Transite® Pipe is surprisingly economical. It actually reduces irrigation cost in five different ways:

1. Design Savings Transite's interior will not be roughened by tuberculation . . . stays factory smooth to assure full water flow. This means you can use smaller diameter, less expensive pipe sizes.

2. Installation Savings Transite is lightweight, easily installed. As few as two men can quickly assemble an entire 18-hole system.

3. Pumping Efficiency Again Transite's

lasting smooth interior pays off by reducing water turbulence to reduce fuel costs.

4. Saves Water Transite's Ring-Tite® Coupling stays tight for the life of the system.

5. Minimizes Maintenance Made of rugged asbestos-cement—Transite cannot rust, resists all forms of corrosion.

The Transite Ring-Tite Coupling saves water loss . . . speeds and simplifies installation.

DESTROY NEXT YEAR'S CRABGRASS NOW!

Tests prove Fall Applications of

DI-MET P.C.C. give up to 100% Control of Crabgrass and Poa Annua

Fall applications of Di-Met P.C.C., a granular tri calcium arsonate, prevent emergence of Crabgrass on fairways and greens all Summer long! Because Fall and Winter weathering breaks down P.C.C.'s granules evenly, assures uniform distribution over the entire soil surface.

Wide-spread testing by Experimental Stations, including the U.S. Dept. of Agriculture at Beltsville, Md., shows conclusively that residual Di-Met P.C.C. retains killing potency all season — does not interfere with grass seed planted in the Spring. Applications made last Fall gave 98 to 100% Crabgrass control during the Summer of 1959. New emergence did *not* develop in mid-Summer.

Fall applications are best for Poa annua control, too. Protected from Poa annua competition, greens fill in to

thick, healthy turf quickly. On greens, apply 1/2 indicated rate in 2 treatments, 2 weeks apart. Heavily thatched greens: apply 1/2 indicated rate in Fall. Balance in late Winter or early Spring.

P.C.C. also kills Chickweed, Japanese Beetle Grubs, White Grubs, Sod Webworms, Earthworms. Safe on Bermuda, Bluegrass and Bents. Where fine leaf Fescues predominate, some reduction may occur. When overseeding thin areas, other type grasses are recommended.

SOUTHERN COURSES

If you don't plan to over-seed this Fall, use quick-acting TAT-42 to eradicate Poa annua in Bermuda or Zoysia turf. Several light applications give complete kill in a few weeks. Call your supplier now.

Don't wait. Now is the time to apply Di-Met P.C.C.,

● the *proven* pre-emergence killer. See your supplier or write for full details.
