

NEW from JACOBSEN . . . Synchronized Mowing . . .

THE TURF-KING 76 76-inch cutting width

Here is another outstanding addition to the Jacobsen-Worthington team of precision mowers, built to out-cut, out-perform, outlast any other equipment designed for golf course maintenance.

From tee to green, from 18 inches to 21 feet, there is a Jacobsen-Worthington mower to help you cut the cost of cutting grass.

Only the Jacobsen Turf-King 76 has these exclusive features:

- Exact adjustment to keep all three

reels at the same cutting height; eliminates streaking.

- Simple hand adjustment for bed knife. No tools needed.
- Variable forward speeds from $\frac{1}{2}$ to $4\frac{1}{4}$ mph (with constant reel speed).
- Wing units capable of cutting 25 degrees up or down.

Easy riding, perfect balance. A highly maneuverable, rugged, large capacity mower.

“AGRICO and AGRINITE

produce
when others
fail!”

Side-by-side tests proved Agrico's superiority to Edward A. Chichunies, Supt., South Shore Golf Course, Hamburg, N. Y.

“I have used Agrico and Agrinite for several years, and have always been rewarded with beautiful dense turf. From time to time I have tried other fertilizers but never had as good results. For my money, you can't beat Agrinite as a summer turf food for greens.

“In the last few years I have fed my greens through the proportioner and I have been very well satisfied. The course including the fairways looked their best this year!”

Best by actual comparative tests—that's the experience of Mr. Chichunies and leading Superintendents everywhere with Agrico and Agrinite!

it's **NEW...**
and it's **ROSEMAN**
THE ROSEMAN HI-SPEED-REEL MARK IV

SMOOTHER TURF • IMPROVED APPEARANCE • REDUCE COSTS • EARLY MORNING MOWING

The ultimate in gang mowing equipment — and perfection in mowing is now yours in the new Roseman Hi-Speed-Reel Mark IV Hollow Roller Drive gang mower.

The Hi-Speed-Reel of the Roseman Mark IV not only eliminates ribbed or washboard appearance but also cuts grass clippings into shorter lengths. With the new Roseman design these pulverized clippings are dispersed uniformly and evenly without windrowing and regardless of climatic conditions. Bunchings, droppings of clumps of grass and messy fairways are eliminated.

Early morning dew, watered fairways, heavy rainfalls and wet areas, no longer are a problem. Whatever the grass condition "early morning mowing" is now possible

with the new Roseman Mark IV Hollow Roller Drive Mower. Beautifully cut, neat appearing fairways are the result.

Non-breakable construction, reliability, low upkeep expense, faster mowing speeds, elimination of hand trimming, lower operating costs, improved playing surfaces and greater member satisfaction—all are bonus features of Roseman Hollow Roller Drive Mowers.

Before you take delivery on your next mower be sure and see the Roseman Hi-Speed-Reel Mark IV Hollow Roller Drive gang mower in actual use on your own course.

Buy and use the gang mower that improves turf, cuts costs and outperforms all others, at all hours of the day, in every way.

**NEW TYPE
PLANT FOOD
SPREADER
FOR
GOLF COURSES**

Cyclone

World's Fastest and Most Accurate Push-Type Spreader

Distributes a 6- to 8-foot swath of granular plant food evenly and quickly — 5 to 10 times faster than ordinary spreaders. The fan-like pattern has a feathered edge which prevents unsightly streaking. Throwing action spreads plant food under shrubbery, in close to fences and buildings, covers high and low spots. High wheel design moves easily over uneven ground.

Bill and Dave Gordon design 18 for Frosty Valley CC, Bloomsburg, Pa. . . . New club will care for members of present Bloomsburg GC which is becoming property of Bloomsburg State Teachers College.

TURF *that Speaks for Itself!*

THANKS 3 1/3 BILLION TIMES

That's a lot of thanks, but we mean every one of them. You who take care of the nation's finest turf are responsible for our success. The figure stands for the 3,342,434,051 pounds of Milorganite sold between 1926 and October 1959. Twenty-three acres of Milorganite stacked 85 feet high should grow grass! It has. Recent research at Rutgers and the University of Florida show why Milorganite is best. Less dollarspot disease, less wilt, fewer nematodes, and top quality when Milorganite is compared with other nitrogen sources, including the urea-formaldehydes, is their story.

Whether continuing or starting a Milorganite program, be sure to keep these vital fringe benefits in mind. Nothing else is as sure, as safe, or as economical as the proven fertilizer for turf — MILORGANITE.

If you have a turf problem, consult: TURF SERVICE BUREAU.

For Best Results on Greens
Use the West Point Aerifier[®] with the New
1/4" Flexi-Press and 1/4" Thatch Spoon

Yes, the West Point Aerifier is now better than ever because of the new 1/4" Flexi-Press and the new 1/4" Thatch Spoon! With these new additions, the cultivating action of the fast-moving, low-priced Aerifier will be even more effective in producing healthy, wear resistant turf.

How important to you this exclusive cultivating action is! Because of it, cores of soil are scooped out so surrounding packed soil has room to expand, yet greens are ready for immediate use. While openings from surface to rootzone are made to admit air, water and fertilizer, the walls of the openings are loosened (not glazed!) so roots can easily penetrate into loosened soil.

Your greens are far too important for you to settle for anything less than the best. Always use West Point Aerifiers.

West Point Products Corporation West Point, Pa.

PUTTING GREENS TOO HARD?

Here's what Terra-Lite Vermiculite
Soil Conditioner
did for one country club

"Greens are
in fine shape now
and with less watering"

writes Superintendent
W. J. Isiminger

Until 1959, Green County Country Club of Waynesburg, Pa., had two serious putting green troubles...compaction and brown-outs. Both vanished completely after greens were conditioned with *Terra-Lite Vermiculite Soil Conditioner*.

"Am very happy with the results," says Supt. Isiminger; "plan to use *Terra-Lite* again next season and don't hesitate to recommend it to anyone else with problems like ours." Why not get *Terra-Lite* and put your greens in prime playing condition right now? If you'd like more information, just mail the coupon.

PRACTICAL ENGINEERING COMPANY

4611 S. ELWOOD TULSA 7, OKLAHOMA

The beautiful Lakeside Golf Course, Burbank, Cal. has Transite Pipe throughout its irrigation system.

Transite cuts irrigation costs 5 ways ... keeps courses greener, too!

For all its quality and dependability, Johns-Manville Transite® Pipe is surprisingly economical. It actually reduces irrigation cost in five different ways:

1. Design Savings Transite's interior will not be roughened by tuberculation . . . stays factory smooth to assure full water flow. This means you can use smaller diameter, less expensive pipe sizes.

2. Installation Savings Transite is lightweight, easily installed. As few as two men can quickly assemble an entire 18-hole system.

3. Pumping Efficiency Again Transite's

lasting smooth interior pays off by reducing water turbulence to reduce fuel costs.

4. Saves Water Transite's Ring-Tite® Coupling stays tight for the life of the system.

5. Minimizes Maintenance Made of rugged asbestos-cement—Transite cannot rust, resists all forms of corrosion.

The Transite Ring-Tite Coupling saves water loss . . . speeds and simplifies installation.
