Walker Manufacturing Adds Power Truck to Its Line

A Power Truck has been added to the line of the Walker Manufacturing Co., Fowler, Kans. It is described as a rugged carrier that will

find many uses around a course. The vehicle is only 100 inches long, is extremely maneuverable and has front wheel drive and rear wheel steering. It is powered by a 2-cylinder, air cooled Onan engine. An automatic shift transmission with torque converter action gives the Power Truck a total of nine forward speeds plus reverse. A swing-over steering column permits driving from either side. The utilized, all-steel body enables the vehicle to carry a 1,200-lb. payload.

Carry-All Is New Addition to U. S. Royal Line

A new addition to the U.S. Royal equipment line is the carry-all shown in the photo. It is made of U.S. premiere Naugahyde and looks

like the finest leather. The material is washable and scuffs and stains don't mar its finish. The bag is available at pro shops in black, saddle tan or oxblood.

Thompson's Commander Said to Keep Down Pressure Loss

Thompson Sprinkler Mfg. Co., 2251 E. 7th st., Los Angeles 23, is marketing a new line

of concealed pop-up rotor sprinklers for golf courses. It is known as the Commander. The sprinkler's pressure loss of 4.5 lbs. at a 15 gpm discharge is said to be the lowest in the industry. The Commander operates at 40 psi and covers an area of more than 100 feet in diameter. Only three component units make the entire line's cleaning and servicing relatively simple. Increased pop-up stem diameter is said to reduce the possibility of damage by heavy equipment. Complete facts can be obtained by writing to the company.

Club and PGA Officials at Dallas in Colorful Attire

There was good showmanship and service in the way the men working on the PGA Championship were dressed. Dallas ACCC tournament committee members wore blue slacks and old gold shirts. Texas PGA members wore old gold slacks and white shirts. Graham Ross, Dallas ACCC pro, and Jack Lust of Di Fini planned the colorful outfits that identified the men who were in charge of tournament details.

Moist O'Matic Develops Two-Speed Automatic Sprinkler Head

The first automatic sprinkler head designed for single-row fairway watering promises substantial savings in water and labor costs for courses, according to Ed. J. Hunter, president of Moist-O'Matic, Inc., a subsidiary of Toro Manufacturing Corp., Minneapolis. The extra large two-speed head eliminates puddling or scallops by providing even distribution over overlaps and side areas of the sprinkling pattern. Like other Toro heads, this new series 660 unit has three nozzle turrets for greater efficiency. Installed flush, the heads pop up to deliver a low angle uniform spray that delivers from .29 to .41 surface inches of water per hour over areas 170 to 200 feet in diameter.
