

Only one glove is "Quality Balanced" — **ACUSHNET**

It's a fact—you can't have everything in a golf glove. If it's too thin, it won't wear; if it's too thick, you can't feel the club.

Acushnet, the leader in producing golf balls and equipment for serious golfers, has engineered a glove that is "quality balanced"—which knowingly combines the features required to give you the very best golf glove there is.

Feel and Tackiness: Soft cabretta, a South American glove leather gives

wonderful tackiness which makes you grip confidently.

Durability: Acushnet gloves have the ultimate combination of thinness for perfect feel and sturdiness for long life.

Fit and Feel: Table-cut and meticulously tailored to fit like a second skin.

Style: Functional, yet smartly designed. A complete range of fashion-right colors and styles.

These fine gloves, like all Acushnet products, are sold through golf course pro shops only.

SWINGING AROUND GOLF

News of the Golf
World in Brief

By **HERB GRAFFIS**

FRONT COVER

The busiest men in Ohio in the past several months have been those seen up front who have been getting ready for the 46th PGA Championship, to be played at Columbus CC, July 16-19. They have been so busy, in fact, that the governor of the state was drafted to give them a hand. In the photo are (from left): Don Shock, host professional, Don Boyd, club manager, Governor James A. Rhodes, honorary chairman, Frederick W. LeVeque, general chairman, H. E. Eschenbrenner, club president, and Robert Mueller, Supt.

EDITORIAL INDEX Page 114

Bob Curley in Paterson (N.J.) Evening News pointed out that three of the neighborhood's pros have 123 years of "tee time" among them: George Jacobus at Ridgewood (51 years); Danny Williams, Sr., 46 years, 18 of them at the Knoll; and Andy La Pola at Preakness Hills, 26 years as pro . . . Joe Phillips in his 44th year as pro at the Links Club, Roslyn, N.Y. . . . Wayne (Red) Davis now pro-manager at Reliez Valley CC, Lafayette, Calif.

Leo O'Grady to Stockbridge (Mass.) CC as pro after four years at De Soto Lakes (Fla.) GC & Lodge . . . Joe Mann, a left-hander who was O'Grady's assistant at De Soto Lakes, has left for two years in the Army . . . A. P. (Pete) Serra, the club's manager, the rest of the staff and the members gave Leo and Joe a farewell party . . . Bob Simmons has designed a golf layout labeled the "Miniature Masters," comprising a nine-hole Par-3, an 18-hole putting course, a 30-tee range and a 36-hole miniature course being built for E. S. Brantner and to be operated by William Loehr in Richmond, Ind.

Quite a few of the swimming clubs that have sprung up in the past few years are installing Par-3 courses . . . Aquamarine Swim Club, Avon Lake, O., to build an 18-hole Par-3 . . . John Lambert opens his "Skyline" Par-3 nine in Greenfield, O. . . . Mobile home "parks" also are going strong for Par-3 courses as popular recreation in compact space . . . Arroyo Fairways Mobile Home Park near Hemet, Calif., to have Par-3 nine . . . Ralph and Patrick Herrera open their "Famous Links" Par-3 nine with holes patterned after holes on great courses . . . "Famous Links" is at Los Banos, Calif., and was designed by Gary Thompson.

New Jersey State GA awards \$500 each in Rutgers university scholarship grants to six caddies at NJSGA clubs . . . Kent CC, Grand Rapids, Mich., completes \$250,000 clubhouse, replacing

**Build a golf course
in ten months?**

Here's how they did it at Dallas Athletic

(Host for the 1963 P. G. A. tournament)

New green at Dallas Athletic Country Club is part of an 18-hole addition. Both four- and six-inch cast iron pipe went into the course which was finished in ten months. Cast iron mains are used throughout the club.

Cast iron pipe speeds course expansion. Cast iron pipe is naturally strong, needs no babying during installation. Simple push-on joints cut pipe assembly time to a minimum.

Country Club

They speeded the job with a cast iron pipe irrigation system. A small end-loader and ditcher were all the equipment needed. Pipe assembly went so fast the ditcher was often pressed to keep ahead of laying.

Once installed, rugged cast iron pipe got to work in a hurry. Frequently carrying more than a million gallons of water in a ten-hour period. Under *minimum pressure* of 100 pounds.

Dependability? With the aid of cast iron pipe the new course was finished and ready for play in just ten months. Steady, trouble-free irrigation made it possible.

And that's not all. With their new cast iron water system, club officials can practically forget replacement worries (and torn-up fairways). They're assured century-plus service. Proof: 55 U.S. cities use cast iron water mains installed at least 100 years ago.

Next time *you* build or modernize, get these values: fast installation, top performance, real economy through the years. They're all yours when you use cast iron pipe.

Three public courses in the

Par 4, 410-yd 1st hole of the 46th PGA Championship, July 16-19

Bob Mueller keeps Columbus Country Club tournament-sharp all season long with AGRICO

"This has always been a championship layout and I have the unenviable job of trying to improve its play," says Robert L. Mueller, superintendent at Columbus, Ohio, Country Club, host to the 1964 PGA Championship.

"Only two greens, No's 1 & 3 on this course, were changed for the PGA. But this applied some pressure. No. 1 (shown above) was stolonized, Nov. 3, 1962 and put in play, June, 1963. We have it in beautiful shape now for the tournament.

"Our greens and tees are fertilized with Agrico Country Club fertilizers both in

the spring and fall. Fairways are fertilized in the fall only. Following this program has consistently improved the turf.

"Agrico Country Club being a granular fertilizer, makes it a snap to apply anywhere—with the spinner type spreader," Bob concluded.

To bring your course to championship playing calibre, follow an Agrico Country Club Feeding Program. Call your Agrico Representative or write: American Agricultural Chemical Company, New York, N. Y. 10007 or Agricultural Chemicals Ltd., Toronto 15, Ontario
