#### THE MAGAZINE OF GOLF BUSINESS

Golf's clearinghouse of information on the most successful operating policies, practices, and products for your club.

Monthly GOLFDOM presents the latest, most practical ideas on golf club and practice range administration, management, maintenance and service . . . for time, labor and money-saving guidance.

Make certain those with the operating duty responsibilities are kept currently informed by reading The Magazine of Golf Business.

Use the form below. We'll see that they get GOLFDOM.

This healthy plot of turf was treated with "Tupersan" at seeding. Note that the area outside the plot, which was seeded but untreated, shows crabgrass browned by frost.

# Introducing Du Pont Tupersan™

# A unique crabgrass killer which permits seeding and treating the same day (SEASON GRASSES)

Du Pont "Tupersan" is a new pre-emergence weed killer which gives highly effective control of crabgrass and certain other annual weed grasses in turf.

"Tupersan" is highly selective. This new crabgrass killer can be used on newly seeded areas as well as on established turf without causing injury to germinating seeds of cool season grasses, such as bentgrass, bluegrass and fescue.

"Tupersan" offers a high degree of safety to turf. Rates as high as 100 lbs. per acre have not injured established turf; rates as high as 27 lbs. per acre haven't injured new seedings or reduced seed germination. And new "Tupersan" has been used at high rates under many trees and shrubs without injury to them.

For full information on new Du Pont "Tupersan," consult your golf course supplier—your service agency.

On all chemicals, follow labeling instructions and warnings carefully.
