

# Announcing new Sarolex for turf. Get spectacular control of both nematodes and insects with just one product.

Season long effectiveness against nematodes. Long-lasting control of insects. Fast green-up. All this with only one product . . . new Sarolex\* nematicide-insecticide. No other product can do as much.

One application of Sarolex provides outstanding, long-lasting control of lance, pin, ring, root-knot, sheath, sheathoid, spiral, sting, stilet, and other plant-parasitic nematodes that attack established turfgrasses. And control generally lasts for an entire season.

Three years of plot and field work in Florida has proved that Sarolex produces results far superior to those you have been able to get with other control materials. Visitors at the recent Florida Turf-Grass Association meeting were amazed when they saw the results of the tests.

Sarolex treatment greens up grass fast . . . Bermudagrass in as little as two weeks, and St. Augustine grass in six to eight weeks, in hot weather.

You get an exclusive bonus with new Sarolex because the rates recommended for nematode control also provide outstanding control of a wide range of turf insects . . . lawn chinch bugs, sod webworms (lawn moths), crickets, armyworms, and many more.

Sarolex has a high margin of safety to established turfgrasses.

You can use Sarolex in combination with other chemicals, and with liquid nitrogen fertilizer.

The most effective period for making Sarolex treatments on home lawns, parks, athletic fields, commercial sod, golf greens and fairways, and around motels, hotels, and office buildings, is between May and September . . . when grass is usually growing fastest, and when nematodes and insects are also most active.

(Continued from page 20)

Owner-builder, Dewey Davis, has opened his Oak Grove GC, 9-holes, 3,024 yards, near Bladenboro, N. D. . . . The operation will be semi-private . . . A new 18-hole, 5,780 yard course and driving range will be built in Downey, Calif., as a public course owned by Los Amigos County, Calif. . . . Estimated cost of the Los Amigos County course is \$785,000 . . . The new Brookside GC, Kingsley, Ia., will be ready for play in late June or early July, according to Guy Ledgerwood, owner and developer . . . Curly Williamson's 20th anniversary as pro at Forest Hills CC, Rockford, Ill., to be celebrated on June 16 with an all-day golf tournament and dinner.

A group of businessmen is surveying the possibility of establishing a Par 3 course and driving range in Rancho Cordova, Calif. . . . Edmund B. Ault has completed preliminary plans for the proposed course near Barnesboro, Pa. that is to be built by the Tri-County Golfers Assn. . . . Herbert H. Winkler, a city employee, has been appointed manager of Cincinnati's municipal Avon Fields GC . . . Winkler previously worked part time as a greenkeeper at Avon Fields . . . The Tri-State Yacht Club on the Ohio River near Evansville, Ind., to have two

## When you pick our products you get to pick our brains, too.

Service is as much a part of our business as the manufacture of irrigation equipment.

Using our service can save you time. And it can insure you pick the equipment exactly right for the job to be done.

We'll visit the project site prior to construction to help you evaluate the problems. We'll figure the budget with you, discuss and illustrate the design criteria, and provide a complete sprinkler system specification on the equipment to be used and the installation procedures to be followed. If you like, we'll also visit the site again, during construction, to smooth out any

field problems.

We can provide complete or partial turf (or agricultural, for that matter) irrigation systems, and complete piping schematics, pumping plant details and water costs.

Some people don't need this kind of service. But they do find our Turf Catalogue useful. An automatic mailing list keeps this catalogue up to date for you.

The Rain Bird Factory and Distributor Consulting Service is free to professionals for most jobs.

Want to pick our brains? Then pick up the phone and call us, or your Rain Bird Distributor.

(In the West): Rain Bird, Glendora, Calif. 91740. (In the East and Midwest): Rain Sprinkler Sales, Div. L. R. Nelson Mfg. Co., Inc., 1012 West Pioneer Parkway, Peoria, Ill.

*Supt. BRUNO VADALA says,*

**"In all the years we've been spraying Tersan® OM, we've had no major turf disease problem.**

**"We were one of the first clubs in this area to use "Tersan" OM and we've continued to rely on it for disease prevention."**

Golf course superintendents throughout the country know from experience that they can rely on Du Pont "Tersan" OM\* turf fungicide for an effective preventive disease program. "Tersan" OM, a mercurial-organic sulphur combination, offers time-proven prevention and control of Large Brown Patch, Dollar Spot, and other major turf diseases. It has a large safety factor under all conditions...gives long-term residual protection.

For crabgrass control in areas where re-seeding is necessary during the season, use Du Pont Tupersan® when seeding. "Tupersan" will not retard emergence of cool season grasses but will control crabgrass effectively.

To supply turf with nitrogen, apply new Uramite® sprayable ureaform. It has all the advantages of granular "Uramite" and it's easier to apply on closely-cut turf.

For full information on dependable Du Pont Turf Products, consult your golf course supplier...your service agency.

\*"Tersan" OM combines the protective features of "Tersan" 75 with the eradicant advantages of Semesan®.

*On all chemicals, follow labeling instructions and warnings carefully.*

# LINDIG

for your  
particular  
Shredding and  
Screening\*  
Jobs

**BIG,  
LITTLE  
AND  
IN-BETWEEN**

K-10 Shredder-Elevator and Screener for hand shovel feed.

B Models, like their big brothers, pass materials (wet or dry) through a synchronized dual assembly for instant action and complete shredding, aerating and mixing. Screener attachment, using shredder's power, is available.

\*Screener attachment optional — removes debris from shredded material

CL Models provide the complete high-volume processing plant—three size capacities 75, 100, and over 200 cubic yards per hour. Load directly into truck.

The Lindig "D" — Two sizes available (20 or 15 yards per hour). High volume and high discharge level. Use inside or out — tractor bucket feed.

L Models with belt conveyors load shredded materials directly into trucks or direct to storage areas three sizes (25, 40 or 60 cubic yard capacity).

All around it's LINDIG, the complete line with Use-Versatility for top soil suppliers, nurserymen, florists, municipalities, golf course superintendents, park and landscape people, universities, peat processors, mushroom growers . . . you name it, there's a LINDIG model to fit your purposes.

All LINDIG equipment features exclusive hammermill action — users benefit with quality production and with time and labor savings. Most models have optional screener attachment for preparation of stone-free materials for top dressing, fine seeding, packaging, etc.

LINDIG equipment's use-flexibility is such that it processes soil materials wet or dry, manure, peat moss, sludge cake, compost — cinders and rock salt, too.

Used around the world, LINDIG equipment is exported and preferred wherever superior, economical processing is required.

# FUTURUS CARPET TILE

**HANDSOME, DURABLE FLOORCOVERING  
ECONOMICAL TO INSTALL—MAINTAIN**

- Absolutely safe and skidproof, wet or dry.
- Will wipe dirt, grime or moisture from shoes.
- Women's spiked heels do not penetrate its surface.
- Highly resistant to spiked soled golf shoes.
- Not affected by exposure to fresh or salt water.
- Can be easily installed by anyone.
- Use outdoors or indoors—completely weatherproof.
- Has excellent sound proofing qualities.
- Neutral color tones blend with any background.
- Guaranteed for THREE years against ALL traffic.

FUTURUS CARPET TILE is made from selected truck and bus tires with nylon cord buffed to chenille-like finish by patented process. Strips of  $\frac{3}{8}$ " thickness are bound to glasscloth, which is impervious to moisture, and cut into 12" by 12" tiles.

*For additional information, prices, write:*

UPLAND, CALIFORNIA

the club's total to 27 . . . **John Sonnenburg** is in his 38th year at Foster Park GC in Ft. Wayne, Ind. . . . Indian Run GC and estates, near Kalamazoo, Mich., are being built and expected to be ready for play next season . . . **Charles Scott**, son of one of the developers and on the maintenance staff at Point O'Woods, near Benton Harbor, Mich., will be in charge of construction.

North Eaton, O's. two golf clubs, Creekwood and Pinebrook, will have a new look this season . . . Creekwood has added nine holes, according to pro **Wilson Mobley**, who says that they won't be ready for play until midseason . . . Pinebrook, originally a nine-hole par 32, is now par 35 and will change to a par 37 in midsummer according to pro-owner **Clarence Bohrer**.

Runaway Bay (Jamaica) GC is undergoing a \$50,000 renovation, with completion expected in October . . . A new course has opened to the Long Island, N.Y. public as a daily fee layout and is called Middle Island CC . . . Pro-

supt. **Jack Patroni** of Apawamis GC at Rye, N.Y., has a new assistant, **Cotton Dunn** . . . **Tony Marco** is filling the newly created job of executive secretary of the Metropolitan (N.Y.) PGA . . . Green Hill CC in Louisburg, N.C. has appointed **Ronnie Reitz** pro . . . He succeeds **Gene Semaske**, who is now pro at Kerr Lake GC in Vance County, N.C.

The Hollywood Hackers, a celebrity golf group that appears on behalf of charitable organizations throughout the country, has added a \$1,000 hole-in-one contest as part of its monthly tournament schedule . . . In event of an ace by a Hacker, \$500 is donated to a charitable organization picked by the local pro in the community where the tournament is held, and another \$500 in prizes and funds are contributed at the club . . . Michigan Turfgrass Field Day at Mich. State University, East Lansing, will be held July 8, 1965 . . . And, the 36th annual Michigan Turfgrass Conference is scheduled for Kellogg Center, MSU, East Lansing, Mar. 16-17, 1966.

## PRODUCTIVE

### TRIANGLE BRAND COPPER SULFATE

resembles the rabbit in one sense at least: both generate results. Copper Sulfate is widely recommended for treating reservoirs, ponds and lakes... irrigation and filtration systems... pipes and drains... to overcome plankton and filamentous green algae. Nothing else yields such good control. Crash programs clear away scum, murkiness and algae odor within five days. Used in the early stages of algae growth (the better way) Copper Sulfate maintains good conditions... economically.

Extra benefit: Copper Sulfate also destroys roots growing into conduits, sewers and drains without sacrificing trees and ornamentals. Literature on request. Write, stating your interest. And rely, when you buy, on Triangle Brand.
