## CAR FOR THE COURSE

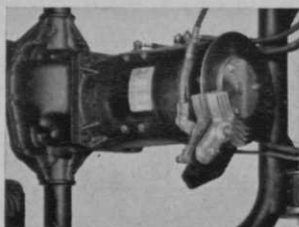

### The all new 1966 Harley-Davidson **ELECTRIC** car

Carefree miles of profitable use with rugged "Total Power Direct Drive." An integral axle/motor delivers all the torque with no couplings, belts or chains to wear out or waste power • Exclusive 2-year warranty on new high-wattage resistor that won't burn out, special alloy contacts on high-capacity solenoids, and a speed switch designed to handle 200 amperes • Oversize rear wheels

mounted on torsional stabilizers prevent tipping. Coil springs and a shock absorbing hydraulic damper provide smooth, level ride • Electric or Gasoline, Harley-Davidson golf cars are serviced locally—warranty service and parts are only minutes away • Call your dealer for a demonstration on your course, and ask about Harley-Davidson's purchase, rent or lease plans.

New rear suspension combines coil springs, hydraulic damper and torsional stabilizer — provides absolute maximum stability and comfort.

"Total Power Direct Drive" — G-E electric motor and Dana drive are one unit mounted on the axle. No wasted power, longer service, better traction.

HARLEY-DAVIDSON  
MOTOR COMPANY  
MILWAUKEE, WIS.

**More people  
are using  
our heads  
these days**

Professionals concerned with irrigation have been using our sprinkler heads for a third of a century.

Now, more of these people are picking our brains, as well. They find the Rain Bird Factory and Distributor Consulting Service invaluable. And it's free to professionals for most jobs.

It saves you a lot of time. And it insures you specify the equipment exactly right for the job to be done.

Just call, or write us, or your Rain Bird distributor. If required we'll visit the project site prior to construction to evaluate the problems. We'll figure the budget with you, discuss and illustrate the design criteria, and provide a complete sprinkler system specification for the equipment and installation procedures. We can visit the site again, during construction, to smooth out any field problems.

We can provide complete or partial turf irrigation systems, complete piping schematics, pumping plant details and water costs.

Next tough irrigation design problem, why not keep your head—and use ours? (In the West:) Rain Bird, Glendora, Calif. 91740. (In the East and Midwest:) Rainy Sprinkler Sales, Div. L. R. Nelson Mfg. Co., Inc., 1012 W. Pioneer Parkway, Peoria, Illinois.

## Ready to go when you are

Hudson Peerless\* power sprayers are "at ready" all the time—on the course, or in storage.

Two features almost eliminate downtime caused by stoppages from clogged nozzles, inoperative or sluggish pump:

1. Nickel stainless steel-clad tank—won't rust, corrode or scale. Flushes out clean, too.
2. Our Ten-O-Matic\* pump. Has no gears, sliding pistons, packing cups, exposed working parts. Three moving parts run in oil. Output up to 10 gpm. Pressures up to 400 psi.

It's a *husky worker*. Sprays up to 30 feet of fairway at a pass. Reaches high into dense trees. Just right for feeding or "blowing" greens for grubs.

You can get a *complete line* of accessories—booms up to 30 feet, any length hoses for gun attachments, tandem wheels with soft tires so easy on turf. Models up to 300 gallons capacity.

Write us for full details.
