

At Whispering Pines GC, N.C., in the Sandhills, Linwood Harmon, supt., shows heavy root penetration in plug taken from bentgrass green.

Thirty-six years ago, Alexander Harris took over as supt. of Princess Anne CC, Virginia Beach, Va. For 18 years, he used bentgrasses on the greens. Three varieties of bent planted originally. He now works toward Penncross. Note various shades of grass.

Firm, direct management pays

There are no committees at Carmel G & CC, Calif. While the system is hardly democratic, it does get things done.

By DON CURLEE

They have constructed more than a magnificent place to enjoy golf at the Carmel Valley Golf and Country Club on California's Monterey Peninsula near Carmel-by-the-Sea; they have built a convincing case for the non-proprietary private golf club.

Everything from the distinctively-styled bunkers to the unique grouping of homesites in the midst of the course's luxuriant greenery has been designed with the golfer in mind, and the non-sense management intends to keep it that way.

Although the sales of homesites at Carmel Valley G & CC are an important source of income, golf is the major source of interest and it takes only a few minutes with any member of the management team to confirm that.

Edgar H. Haber, president of Green Meadows, the corporation which operates Carmel Valley said, "We believe golf should be played more like they do in England where it's not uncommon to play 18 holes in 2½ hours. We

think 3½ hours is plenty and we plan to see that our members always have the opportunity to get around the course promptly when they want to."

Management doesn't object to slower players as long as they adhere to the club rule of allowing faster players through, and like all the club rules, they mean it.

If it sounds as if they have a tough attitude, it's a misrepresentation. They have a *firm* attitude, gently and consistently applied—all in favor of the

PLAY IT COOL

Summer golfwear is designed to keep the golfer cool and comfortable under the strongest sun. Synthetics play the biggest role and are responsible for airy fabrics. Shirts of arnel, kodel, ban-lon and antron, and slacks of dacron and rayon are the most popular in cool, subdued colors. Mesh knit shirts for men are showing up everywhere in all colors and different size knits. Seersucker in men's slacks and ladies' bermudas reappears as it does every summer.

By **JOYCE HAKLAR**
Golf/Golfdom Fashion Editor

Right: white collarless cotton fishnet shirt (\$5), dacron and rayon slacks (\$16.25), both by DiFini, Etonic shoes (\$39.95), Texace cap. Flowered nylon blouse (\$10), gold knit bermudas (\$16), outfit by Haymaker, Lazy Bones shoes (\$16), Wigwam socks.

Striped Tony Lema shirt by Jockey (\$5), radish slacks of dacron and cotton by Gino Paoli (\$18.95), Stylist shoes (\$37.50).

Pour Your Turf A Steady Diet

Turf needs a steady diet of nitrogen for sturdy, uniform growth. It's easy to fill that essential need with Du Pont Uramite® ureaform fertilizer. This time-tested, 38% nitrogen feeds turf continuously without burning or leaching. That's because most of the nitrogen in "Uramite" is gradually released for long feeding.

"Uramite" is also available in sprayable form. It's ideal for use on closely-cut greens because there's no mower pickup. In addition, it gives you all of the advantages of granular "Uramite".

This spring, use "Uramite". And if you've

got a crabgrass problem, try this new product: Tupersan® siduron weed killer. It's the only crabgrass killer that can be used the very same day that you're seeding (cool season grasses). It can also be used on established turf.

For full information on "Uramite", "Tupersan", and other dependable Du Pont Turf Products, consult your golf course supplier...your service agency.

With any chemical, follow labeling instructions and warnings carefully.

Better Things for Better Living...through Chemistry

First range ball with the crisp sound and feel of power

the new Burke-Worthington High Compression Range Ball

ORDINARY RANGE BALL. Larger size center means less room for high compression windings inside the cover.

NEW BURKE-WORTHINGTON HIGH COMPRESSION BALL. A smaller solid center permits many extra yards of high compression windings.

Now you can offer your players a ball with the sweet "click" and feel of high compression power. It's the new Burke-Worthington High Compression Range Ball. We've reduced the size of the solid center to make room for extra high compression windings. You get a range ball with the crisp sound and feel of power. Tough, durable cover resists cuts and scars. Long-lasting finish keeps its sparkling freshness throughout heavy play.
