

Cooper Champion

GREENS MOWER

FULL 21" CUT

TURF GROOMER

DESIGNED AND
ENGINEERED WITH
"GOLFERS" IN MIND

Here is the Greens Mower that you've been waiting for . . . a real "Pro" in its own right in the field of greens mowers. Performs with fingertip control with rugged durable performance. All this plus an economically designed mower to reduce your maintenance problems. Another high quality feature is COOPER'S selection of top-grade materials that are employed in all of their manufacturing processes. With this insurance of craftsmanship there is no doubt for a smoother running and longer life "COOPER CHAMPION".

*Built for the best
in golfing*

Lightweight with perfect balance for smoother cutting.

B & S 3.00 HP 4-cycle Engine with Recoil Starters.

Power driven, quick-on, quick-off transport wheels — saves time from green to green.

Write for literature and detailed specifications.

Seldom needs maintenance, this Link-mobile golf car. Simplified design, rugged strength see to that. Make this one easy and fun to drive besides. 8 hp engine levels 35° grades, with speeds to 10 mph. Goes five 18-hole rounds on a 3-gallon tankful of gasoline, with fuel to spare. Heavy-duty

muffler eliminates backtalk. Sleek body is fiber glass to avoid rust. Choice of sparkling colors molded in to last. Whole body tilts up for easy engine servicing—just right for your fleet. Write for details.

Linkmobile DIVISION, NORTHWESTERN MOTOR CO., FAIRMONT, MINN.

Lower the boom on cost

You can, when you let Davey remove dangerous, dead trees and broken branches.

Davey experts use the most modern equipment—keeping damage to surrounding areas to a minimum.

Using Davey equipment eliminates all cost for you of owning and maintaining expensive equipment—another way Davey helps you lower the boom on cost.

And don't overlook pruning off low, winter-weakened branches overhanging pedestrian areas. Why risk a law suit from an unnecessary accident?

Now's the time to have Davey do the job—while branches are leafless and clearly visible.

No golf car is truly deluxe if it

Demand for automotive steering has become almost universal among players as well as courses. As the nation's largest maker of golf cars, we still offer three different tiller-bar models, but demand for them is dropping fast.

Why this trend to steering wheels? Players are used to driving an automobile, and a steering wheel is a normal thing to hold, with a predictable reaction.

With more and more ladies on the courses, the ease of operation of a steering wheel has become another extremely important factor. In

***Automotive steering
is standard
on these
Cushman models***

Cushman Trophy - Gas or Electric

Cushman Deluxe - Gas or Electric

doesn't have automotive steering

actual tests where both types of cars are available, the steering wheel cars go out faster and more frequently, increasing golf car income sometimes as much as 20%.

And the additional cost for automotive steering is almost negligible. For example, the actual price difference between the Cushman Deluxe with automotive steering and without is only very little—a real bargain in performance, comfort and extra income.

So, if you're thinking of a new fleet this year, insist on automotive steering. There are no tiller bars that are "just like" automotive steering. Only a steering wheel pays off for you at the cash register, and in extra player comfort and satisfaction.

See your Cushman Distributor today. He's "Mr. Golf Car" in your area.

LINDIG

Makes the Good Earth Better!

CL Models load directly into truck. The three capacity sizes: 75, 125 and over 200 cubic yards per hour, provide high-volume processing plants. Available with optional screener attachment.

L Models load shredded materials directly into trucks or direct to storage areas. Three sizes available (25, 40 or 60 cubic yard capacity). Rotary screener attachment available.

For high volume and high discharge level it's the Lindig "D". Use inside or out — two sizes available (20 or 15 cubic yards per hour). The Lindig "D" is tractor bucket fed. Shown with vibrating screener attachment.

For soil preparation it's LINDIG, the complete line with versatility for all types of jobs . . . big, little and in-between.

LINDIG equipment processes soil materials wet or dry: manure, peat moss, sludge cake, compost — cinders and rock salt, too.

All LINDIG Shredders have exclusive hammermill action — shred, aerate, mix and screen soil materials for healthier plant growth.

All around the world Lindig equipment is preferred for superior, economical processing. There is a LINDIG Model for you . . . Select One Today!

K-10 Shredder-Elevator and Screener. Hand Shovel Feed. Elevates soil materials (up to 6 ft.) for discharge to transport or stockpile.

"B" Models — hand feed — available in several sizes with capacity range of 3 to 25 cubic yards per hour. Screener attachment available. Removes debris from shredded materials.
