

Typical high-income producing GOLFOMAT wing in operation.

## IS YOUR GOLF COURSE A PART TIME JOB?

**GOLFOMAT®** will put you in business 12 months a year . . .

Let's face it. Unless your golf course produces substantial income during winter months, you have a part time job. With the addition of a GOLFOMAT wing, your golf course facilities continue to produce a healthy *profit* from GOLFOMAT greens fees, sale of pro shop supplies, food and beverage sales—day and night, rain or shine—12 months a year.

GOLFOMAT is the highest income-producing facility in which any golf course operator can invest. Evidence: At Lakeside Golf Club, Ft. Wayne, Indiana, gross revenue from the club's GOLFOMAT wing produces a net profit equal to or exceeding net profit from two outdoor courses.

If you'd like to convert your golf course into

a steady profit producing operation 12 months a year, the answer is GOLFOMAT. Only a modest cash investment is required.

Any responsible assistant can successfully manage a GOLFOMAT wing and net thousands of dollars a month while pro-managers bask in Florida sand traps during winter months.

Time is required to erect a GOLFOMAT wing. The time to investigate is *now*.

*GOLFOMAT is real golf, indoors, on world famous courses, made possible by computerized electronics and optics. Players hit regulation free-flying golf ball, use every club in the bag, swing with all the force and finesse that is required outdoors. You've got to see GOLFOMAT to believe it.*

Howel H. Hopson, President

**GOLFOMAT®**
