

Typical high-income producing GOLFOMAT wing in operation.

IS YOUR GOLF COURSE A PART TIME JOB?

GOLFOMAT® will put you in business 12 months a year . . .

Let's face it. Unless your golf course produces substantial income during winter months, you have a part time job. With the addition of a GOLFOMAT wing, your golf course facilities continue to produce a healthy *profit* from GOLFOMAT greens fees, sale of pro shop supplies, food and beverage sales—day and night, rain or shine—12 months a year.

GOLFOMAT is the highest income-producing facility in which any golf course operator can invest. Evidence: At Lakeside Golf Club, Ft. Wayne, Indiana, *gross revenue from the club's GOLFOMAT wing produces a net profit equal to or exceeding net profit from two outdoor courses.*

If you'd like to convert your golf course into

a steady profit producing operation 12 months a year, the answer is GOLFOMAT. Only a modest cash investment is required.

Any responsible assistant can successfully manage a GOLFOMAT wing and net thousands of dollars a month while pro-managers bask in Florida sand traps during winter months.

Time is required to erect a GOLFOMAT wing. The time to investigate is *now*.

GOLFOMAT is real golf, indoors, on world famous courses, made possible by computerized electronics and optics. Players hit regulation free-flying golf ball, use every club in the bag, swing with all the force and finesse that is required outdoors. You've got to see GOLFOMAT to believe it.

Peter J. Lamborghini
Vice President & General Manager
