## WASHINGTON CUTS BACK

continued from page 69

its stand. President Nixon is determined to cut back on inflation and a tight money policy, aimed at halting inflation, is part of that fight. This means that interest rates will be kept high for the foreseeable future.

And Government officials point out that it would be inconsistent at this time to continue low cost Government loan programs while regular commercial banks have raised their rates drastically.

Opponents of the Government's move believe that golf courses create great amounts of increased taxable acreage, affecting the tax rolls of the communities in which they are located. The increased taxes derived from the land, they go on, exceeds the subsidized interest rate.

Another objection is that "green belt" areas serve not only as recreational sites, but also as a kind of aesthetic relief from the gray monotony of asphalt and concrete. □
