

# We're out to improve your business

**We're going on  
network TV  
to offer your  
customers  
3 lessons -  
from you.  
Paid for  
by Acushnet.**

We've been telling golfers there's one thing we can't build into a Titleist club: your expert advice. To prove it, we're offering 3 free golf lessons with each set of Titleist woods and irons purchased in your shop. We'll credit your account for \$25 for the 3 lessons. If your customer prefers, he can choose \$25 worth of Acushnet merchandise from your shop, and we'll credit your account.

We're a major sponsor of the PGA, the U.S. Open, the British Open, and the Tournament of Champions, all on ABC-TV. We'll be making this offer to millions of golfers who normally buy their golf equipment downtown. Our aim is to lead them into the pro shop, the only place they can get real value in golf equipment.

This combination of network TV and free golf lessons is a powerful one. It's the biggest promotion in our history, and we want you to be part of it. Your Acushnet rep has the details.

 **ACUSHNET SALES COMPANY**

Sold thru golf course pro shops only

## Rent the best...Harley-Davidson.

Because Harley-Davidson doesn't cost any more to rent than an ordinary golf car. Rental fees are all pretty much the same. It's the cars that are different. And Harley-Davidson golf cars make the difference. Running, our gas car makes less noise than your own

voice. And exclusive instant ignition eliminates idling. Gives you absolute silence on every shot. The electric runs farther between charges. So you'll never be stranded in the middle of the 16th. Gas or electric, both are the smoothest riding golf cars you ever played a round with. Cars

designed to let you put everything into your game. That's why it's Harley-Davidson, exclusively, at nearly 3000 clubs all over the golfing world. If your club isn't one of them, you might well be wondering why. AMF | HARLEY-DAVIDSON, Milwaukee, Wisconsin 53201.

# Guess which one putts truest. Wrong.

These are probably the five best balls in the game.

And right out of the wrapper, not one of them takes a back seat to Faultless. On any score.

But after you powder 'em down the fairway a few times, that's when you begin to notice a few differences.

Some conventional balls start to lose their balance. Get out of round. Even the best of 'em, like Titleist. Dot. Maxfli. Staff.

As a result, they may not putt as true. Drive as true.

And that's why the pros take a fresh ball every couple of holes.

But a Faultless? Lee Trevino will tell you. It's solid. Has no core or winding or cover that can get

out of round. So it can't lose its balance. Ever.

Drives and putts like it's got eyes.

Another thing. Anyway you cut at it, you can't cut it.

Which is pretty important, because all it takes is a slight crack to send a ball off line.

But that's not all. Faultless has just developed a brand new computer-blended formula. To give you an even faster, even longer ball than before. Round after round after round.

All things considered, Faultless is the ball that can give the others some pretty lively competition.

Surprised? We expect you to be.

Now it's a whole new ball game.

## Faultless

We started a whole new ball game.

Faultless Golf Products, Division of Abbott Laboratories

# So. Your sprinkler is almost complete

# Chances are we'll find more than

Let's say you've got the go-ahead for a new automated sprinkling system for your golf course. And now you've got to make sure you draw up specifications that aren't full of holes.

There are more potential holes in installation contracts and specifications than you might imagine. Details like the protection of life and property. Performance bonds and make-good guarantees.

Details like insurance. Ordinances and regulations. Definition of materials and workmanship. Storage and cleanup of materials. Course "downtime." Grades, drainage, pumps, pipes, flushing, testing. Sprinkler selection and spacing. Pressure, uniformity and hydraulics. Water coverage. Delivery dates. Permits and inspections...the list goes on and on.

The Rain Bird Golf Team was established to back up your

# system proposal and ready for bid.

## 18 holes in it.

judgment with the judgment of six men who know golf course irrigation systems better than anyone else. They've had experience in hundreds of installations across the country. And they know all about contracts. All of their knowledge can be yours — at no cost or obligation.

So before you sign your name to a piece of paper that may well come back to haunt you, get in touch with a member of the Rain Bird Golf Team. He can be reached through your Rain Bird distributor.

1.

## Only the Ryan "Green Team"

2.

## provides the perfect system

3.

## for keeping perfect greens.

The perfect combination of equipment for maintaining superb greens is the Ryan "Green Team". This turf trio of rugged, proven machines provides a system for keeping perfect greens.

First, you use the Ryan Greensaire (1) which aerates and dethatches in one easy operation. The Greensaire removes more cores (3" long) than any other aerator made. Its fast, clean coring action removes over 2 cu. yds. of soil and thatch per

5,000 square feet.

Next, use the Ryan Matabay (2), or Ren-O-Thin, to break up the cores in just a few minutes. Its vertical blades can be set to skim the turf surface or lowered to remove additional thatch.

Completing the system is the Ryan Spread-Rite (3) which can top dress, and drag a freshly aerated green. For perfect greens, use the perfect system... The Ryan "Green Team".

# Introducing the Dawn to Dusk Battery.

## The amazing new battery for golf cars from Exide and Willard. Delivers 41% more running time and a two-year guarantee.

No golf car battery made can compare with this revolutionary new power source made only by Exide and Willard. It's rated at 106 minutes of continuous running power, or 41% more than standard\* golf car batteries.

That's enough power to let your golf cars run from sunup to sundown for two full years. We guarantee it. In writing.

What's more, the new one piece cover and quarter-turn vent caps save battery main-

tenance and inspection time.

Any way you look at it, Exide's and Willard's exclusive, new polypropylene EV-106 battery could mean more money and less aggravation for your course beginning this year.

Call your nearest Exide or Willard distributor (or Jim Williams in our Cleveland office at 216-861-7100, collect) before you buy batteries this season. He'll be glad to give you all the specifications on

Exide's and Willard's new line of polypropylene batteries for golf cars, including the new EV-88.
