# Apply URAMITE<sup>®</sup>

UREAFORM FERTILIZER

for the  
healthiest  
turf  
on greens,  
tees, and  
fairways.

Just two applications of Du Pont URAMITE—one in the spring and one in the fall—gives your turf grasses the steady nitrogen diet they need for uniform rich color and sturdy growth. This high-quality ureaform fertilizer has a high content (38-0-0) of long-lasting, gradual release nitrogen. Feeds turf continuously without leaching or burning.

A little URAMITE goes a long way. It's concentrated so there are fewer bags to carry, less material to apply and less storage space is needed. So you save valuable time and labor when your manpower requirements are at their peak.

With URAMITE, you get rich color, excellent turf density and growth is uniform—not excessive such as follows applications of solubles—and there's no need for continual applications of nitrogen from organic sources.

Now is the time to start your turf on the steady diet URAMITE supplies. For full details, talk to your golf course supplier.

*With any chemical, follow labeling instructions and warnings carefully.*
