KENTUCKY BLUEGRASS

Baron Kentucky Bluegrass is the perfect choice for golf course fairways. It is a dwarf variety which germinates rapidly. Baron remains shorter and needs less frequent mowing than the known varieties of Kentucky bluegrass, which affords obvious economic advantages. It takes low mowing beautifully, even as low as 3/4 inch. The sturdy, broad blades interlock to make a "crisp" surface that holds a golf ball well on the fairway. The dense turf is winter hardy with a fine winter color. Its leaves stay relatively unblemished by leafspot, rust or stripe smut. All Baron seed is CERTIFIED BLUE TAG, poa annua and bentgrass free. Baron sod is available from leading sod growers across the country.

* U.S. Dwarf Variety Plant Patent No. 3186

Husky BARON cluster (left),
common bluegrasses (right), mowed about one inch.

THREE GRASSES RELEASED FROM THE UNIVERSITY OF RHODE ISLAND

Certified
Jamestown
RED FESCUE (A Chewings Type)

A great new winterseeding grass for golf greens is Jamestown Red Fescue, marketed exclusively by Lofts Pedigreed Seed, Inc. It is a top-rated, rapid germinating, Chewings-type fine fescue. Just right for overseeding Bermuda greens . . . hefty enough for convenient sowing and excellent vigor, small enough for economical high-population stands . . . Jamestown provides the rich, deep color and low, dense growth so ideal for putting surfaces. Highly recommended by Dr. Fred Ledebor (pictured at right), of Clemson University's Horticulture Department.
