

baron

U.S. Plant Patent No. 3186, Dwarf Variety

the aristocrat of Kentucky bluegrasses

STRONG ROOT GROWTH is the secret of **baron's** dense turf. It is the extremely rhizomatous nature of **baron** Kentucky Bluegrass that is making it the favorite of the turf production industry. It rapidly forms a dense turf which is lifted and transported easily without damage. *In the Midwest, **baron** sod has been lifted 10 months after planting.*

QUICK ESTABLISHMENT is another important characteristic of **baron**. This laboratory photo shows a germination test on **baron** (right), as compared with Merion, just two weeks after sowing. In the soil, the difference is even greater.

baron is available as sod from leading sod growers across the country.

For details (and the name of your nearest **baron** distributor or sod grower) on this fast-germinating, slow-growing, disease-resistant, winter-hardy bluegrass for golf courses, fine lawns, commercial locations, and sod production, write or call Lofts.

Exclusive North American Grower and Distributor

Lofts Pedigreed Seed, Inc.

Bound Brook, N.J. 08805/(201) 356-8700

Exclusive Canadian Distributor: Oseco Ltd., Brampton, Ont.
