

No. 1 reason for converting to a TORO Automatic Sprinkler System:

TORO[®]

Results.

And if you want more than one good reason, here are 9 more:

- TORO'S new 670 head gives you the wide spacing you need for conversion at lowest cost.
- Controlled precipitation rate aids growth, maintains healthy turf, improves your course.
- Shorter irrigation time allows earlier and later play.
- Cuts water waste by at least 30%.
- Eliminates need for night crew, cuts labor costs.
- TORO valve-in-head (single head control) compensates for terrain difference, preventing line drainage, puddling, and wet and dry spots.
- TORO Vari-time central controller puts irrigation at superintendent's fingertips.
- Easy installation means minimum turf disruption, no

down time or interruption of play.

- You can convert greens and tees or greens first, then fairways, paying as you go.

If you're considering a TORO conversion, you may already be half-way there . . . considering that a TORO automatic system can probably use most of your existing pipe. Find out how to go all the way to TORO results.

Write today for a complete conversion brochure:
TORO Irrigation Division, Dept. G-375, P. O. Box 489,
Riverside, CA 92502.

Equal Opportunity Employer

Four of the world's best turf care products. The Hahn Tournament Triplex.

The Hahn Tournament Triplex® is more than just a pretty face. Underneath her beauty lies the hardest working greensmower on the course.

She's first of all an excellent greensmower. She manicures greens with the precision demanded by the fussiest golfer. But that's expected from a Hahn greensmower.

What makes the Tournament Triplex different are the three other systems you get when you use her interchangeable cutting heads.

1. The patented *Verti-Cut® Units* for removing thatch and grain before they form. 2. The *Vibra-Spiker® Heads* that eliminate the back-breaking ordeal of "summer aerification." 3. The Utility Units for approach and tee mowing . . . or greensmowing after top-dressing.

Ask your Hahn distributor for a demonstration ride on our beautiful "Greens Management System." She's in a class all by themselves.

"I'VE NOTICED ON P.G.A. COURSES I'VE PLAYED THAT HARD USE AREAS SEEDED IN MANHATTAN PERENNIAL RYEGRASS HOLD UP BETTER, LOOK BETTER AND PLAY BETTER THAN OTHER GRASSES. . ."

Patuk C. Fitzsimons

Fitzsimons on CERTIFIED Manhattan

TURF-TYPE

PERENNIAL RYEGRASS

- GREAT FOR HARD USE AREAS
- UNIFORM DARK GREEN COLOR
- FINE TEXTURED—BLENDS WELL WITH OTHER GRASSES

Manhattan Perennial Ryegrass was selected and developed by Dr. C. Reed Funk, Rutgers University. Manhattan develops a uniform dark green leafy, dense turf with leaf blades as fine as many Kentucky bluegrasses.

Pat Fitzsimons, in winning the Glen Campbell Los Angeles Open at Riviera CC, Calif., Feb. 20-23, set a new course record of 64 for a single round and tied Ben Hogan's record for this event. Fitz, above, tees off on the No. 1 Manhattan tee at Salem Golf Club course, Salem, Ore., where he previously tied the world record score of 58 on a 6,000 yard course.

Certified Manhattan is grown by the

CONVENIENT SHOPPING

For more information about the products advertised in the pages of GOLFDOM—use the postage-paid Reader Service Card in this issue.

Westinghouse golf cars topped Pikes Peak. A grueling 12.42-mile climb.

To prove the hill-climbing ability of Westinghouse electric golf cars, we ran two up the famous Pikes Peak Auto Hill Climb course.* Both cars made it to the top. 21,859 yards up to the summit, a 14,110 foot elevation. How steep is your course?

Power. Distance. Reliability. Westinghouse electrics deliver. Power to spare. For rugged grades. Over long courses. And they're priced right to help you make money whether you buy or lease.

And, of course, they're comfortable. Safe, too, with

automotive-type brakes on both rear wheels. But the important thing is they're built to operate from dawn 'til dusk, day after day. On an overnight charge.

You can be sure if it's Westinghouse.

Westinghouse Electric Vehicles, Westinghouse Bldg., Pittsburgh, Pa. 15222.

*Test sanctioned by the U.S. Auto Club with Westinghouse 3- and 4-wheel golf cars each using six 110-minute batteries. The test was conducted with the cooperation of the city of Colorado Springs, Colorado, and the U.S. Forest Service.
