

“About ready for your rake, Harry?”

Poor Harry. If only his technique matched his equipment . . .

Even pros have bad days, but high handicappers like Harry need all the help they can get. So Harry rides a **Melex**. Between traps he gets a smooth, quiet, incomparably comfortable ride. Easy maneuverability around trees. A stand-up bag rack that puts clubs and rakes at his fingertips. And more holes from a single charge than any other golf cart on the market.

Wherever Harry's ball goes, his **Melex** goes with ease. It's equipped with four speeds in forward and reverse. Automatic steering and suspension. Plenty of power. An automatic charger and hill holder. And rib-traction tires that take to the turf without tearing it up.

The **Melex'** distinctive styling turns heads on the tees, but its quality engineering keeps a low maintenance profile. The frame on both the 3 and 4-wheel models is constructed from tough tubular steel. Heavy-duty batteries, baked enamel paint and a protective undercoating provide further wear and tear insurance. And service is only a short putt away. Our network of full service dealers are equipped with computerized parts, warehouse facilities and mobile service vans to keep Harry on course.

As for options, there are hard tops, tinted glass, rear view mirrors, wheel covers and even an industrial conversion kit to choose from.

Best of all, putting Harry in a **Melex** won't put a dent in your profit picture. For all its luxury features, impressive good looks and creature comforts, the **Melex** boasts the lowest list price on the market. And, it's built to take even a game like Harry's in stride.

So, put Harry in a **Melex**.

It's the best deal for both of you!
