

# Penncross. the final touch

BYRON NELSON

MT. MITCHELL GOLF COURSE  
Burnsville, North Carolina

Mr. Golf, Byron Nelson on Penncross: "Over the years golf course people have tried many types of grasses for greens. In the last ten years, many of the championship courses have produced near perfect putting greens. In my estimation, this is because of the development and wide spread use of Penncross Bentgrass. With good maintenance, it provides a uniform putting surface that putts true and has good color."

It takes a great deal of time and money to build a golf green. Irrigation, drainage and contour are some of the considerations of a great putting surface. The final touch is the type of grass selected for that putting surface. Penncross Creeping Bentgrass is recognized around the world as a superior grass for golf course use. Penncross is more genetically uniform, disease resistant and it establishes quicker than conventional bents. From Palm Desert, California to Anchorage, Alaska, Penncross has proven its climatic adaptability. For that final touch to a great golf green, look to Penncross!
