

PENNCROSS makes a POINT

Penncross costs less, seed for seed, than Annual Ryegrass.

Points on Penncross

1. **Penncross Creeping Bentgrass** required years of selecting and crossbreeding to develop. This unique grass is especially designed for the demands of golf courses.
2. **Penncross** is grown under a strict certification program by elite seed growers in Oregon's Willamette Valley, where the highest quality seed is produced.
3. **Penncross** is a true polycross

hybrid bentgrass developed for superior turf and greater disease resistance.

But, did you know, Penncross costs less, seed for seed, than annual ryegrass? For example, if you purchased a pound of annual ryegrass (approximately 200,000 seeds) for 30 cents, you would have to pay \$12 for as many ryegrass seeds as you would receive in one pound of **Penncross** (approximately 8,000,000 seeds).
