How Roundup[®] helped Jim Siegfried renovate this fairway in days, without closing it for one minute.

Take a good look at this goodlooking fairway.

Last fall, Jim Siegfried found a way to clean it up, without tearing it up —at the height of his club's busy season. With Roundup* herbicide by Monsanto.

Jim is the Greens Superintendent at Losantiville Country Club, Cincinnati, where bermudagrass had become a serious problem on the 18th fairway. To control it, Jim applied Roundup once—while the weeds were still actively growing—right at the start of the Labor Day weekend.

"That's really 'prime time' here," Jim told us. "But after we applied Roundup, we kept the fairway in play the whole weekend, and after. The members played right over it, with no problem."

Since Roundup has <u>no</u> residual soil activity, and won't wash or leach out of treated areas to injure desirable plants, Jim simply took normal precautions against spray drift—and didn't worry about damaging desirable vegetation along the fairway.

Even better, he was able to reseed right into the dying bermudagrass only 7 days after applying Roundup without loss of playing time or inconvenience to the membership.

Reinfestation won't be a big problem for Jim, either. He knows that Roundup destroyed the rhizomes of the treated weeds, helping prevent their regrowth.

Jim thinks he'll use Roundup again this year—and apparently some club members hope so, too. "As soon as they saw how good this fairway looks, some of the members started asking when I'm going to do the same for #10, where we have some more bermuda. I'll probably tackle that with Roundup this fall."

If controlling many tough emerged weeds and grasses is a problem for you, see your local Monsanto representative or chemical dealer soon for your supply of Roundup.

Roundup. It worked for Jim Siegfried. It can work for you.

There's never been a herbicide like this before. Circle 124 on free information card

"Organize a Junior Golf Program. It's a great place for kids to play a round."

Youngsters have never faced as many temptations and frustrations as they do today. And that's why I think it's particularly valuable for boys and girls to get involved in a sport like golf. It not only gives them a chance for selfexpression, but it's a great teacher of self-reliance and self-discipline.

The problem is, most kids don't have an organized Junior Golf program to encourage them and help them learn the game. And that's why the National Golf Foundation is so important.

They've been promoting Junior Golf since 1936. And they'd like nothing better than to help you start a Junior Golf program at your golf club, in your schools, or in your town. I started in a Junior Golf program myself. And believe me, there isn't a better place for a kid to grow up than a golf course.

NATIONAL GOLF FOUNDATION

Emergency oxygen

General Scientific Equipment company has a simple-to-operate oxygen unit that delivers oxygen in seconds. The unit has a breathing mask that fits all facial contours and a seven foot vinyl tube for flexibility of use. Pre-Med requires no special training or maintenance. It weighs 4½ pounds and stores easily. By turning a single knob, between six and seven liters of oxygen per minute is produced for 17 to 18 minutes. A solid oxygen system that includes an insulated oxygen generator and a purification cylinder is used. The unit exceeds both FDA and USP standards of oxygen rate, volume and purity, according to General Scientific Equipment.

Circle 701 on free information card

The product effectiveness is further complimented by its price range of less than \$350.00 installed, according to David Sauder, president of Preferred Security Components, Inc.

Circle 702 on free information card

Mole cable layer

The Grundomat Mole bores a below-surface tunnel through any type of soil, rock or masonry, pulling cable or pipe behind it, using compressed air. The only starting preparation required is a pit. Then it is simply a process of aligning the Grundomat on target, connecting the air hose and starting. Depending on soil conditions, the chisel head hammers out a borehole along the intended route at 20 to 200 feet per hour. It is available in five diameters from 2½-inches to 8-inches with a full line of accessories for pulling PVC, thin PE, PE and steel pipe, as well as cable.

Detecting device

The Cartell detecting system sets up an adjustable electromagnetic field in a driveway or any vehicle passage area, to detect vehicle entrance or exit. Upon sensing, the system will activate outside lights and provide an audio alert signal. The system can be installed in four hours. A low voltage probe is buried next to the driveway and the electronics can be

Pump hose

Clinton Engines now offers optional intake and discharge hoses for its Chief Pro pump or any other pump requiring 2-inch diameter hoses. The intake hose is made of flexible lightweight PVC plastic with a high density spiral of PVC embedded into the body of the hose to prevent collapsing. Its smooth twoinch bore allows water, slurry, or small solids to pass through easily. It is not recommended for use in extreme cold or heat, however. It is available in 25-foot lengths with male nipples at either end.

The discharge hose is made of PVC plastic with a textile reinforcement and can be rolled up in a small coil. It has both male and female couplings and is available in 25-foot lengths.

The Chief Pro Pump, introduced a year ago, is a self-priming centrifugal pump that can deliver 8400 gallons per hour.

Optional diesel

The 1980 Swinger Model 200 now offers an optional 154-cubic inch diesel engine. The 4-cylinder, water-cooled diesel produces 48.5 SAE hp at 2800 rpm for 4-wheel hydrostatic power, according to Dynamic Industries. The model 4.154 Perkins diesel engine uses a replaceable dry element air filter, a full-flow cartridge oil filter, and a dust-free, sealed 30 amp alternator.

Other Swinger Model 200 changes for 1980 include increased fuel capacity, oil pressure and ammeter guages, load sensing steering, and an optional fourth valve spool for secondary auxiliary hydraulic operation.

How to pile up extra profits -without investing a cent!

With Stewart Sandwiches! People all over the country are piling up big profits selling Stewart Sandwiches. Profits that supplement regular business income, and even add to it through customer convenience and traffic building. And Stewart's complete program makes it the easiest, safest money you've ever earned.

There's no investment, no risk, no special equipment or training. You pay only for the sandwiches you sell, and Stewart lends you their special oven, free of charge. Stewart also manages your inventory and delivers to you on a regular basis.

Hefty, hearty, piping hot Stewart Sandwiches and pizza are great impulse items. There's a wide variety of sandwiches for every taste. And Stewart helps you sell with attractive menus and point-of-purchase displays.

To pile up some extra profits, fast, rush the coupon for details.

Circle 108 on free information card

Viewpoint

A general manager wrote a letter asking whether the pro or the superintendent should determine what maintenance practices should be performed on a daily, weekly, or monthly basis.

Course maintenance is based on two factors (really three, counting budget). One is the agronomics of the plant life on the course. The other is the requirements of the game of golf. Good turf management often requires practices that are objectionable to the golfer. And if you're managing the turf on a golf course and you make the golfer mad, he won't play your course. Or the members will get mad and you'll be out of a job.

A good golf turf manager will know the requirements of the game and will manage his course to provide optimum conditions for the game of golf. Agronomically speaking, this requires much more knowhow than does simple turf management. You must know that the game requires shorter fairway grass than does good agronomics. So, you mow it shorter and dive a little deeper into the knowledge it requires to maintain the turf at that height as good as it would be at the taller height.

But, if you're of a mind, then you don't know that. The pro must tell the general manager that the fairway grass is too tall, it needs mowing closer and more often, and you run around and gripe that the pro and the general manager are buddies and they're out to get you. And in a way, the pro and the general manager are better buddies than you'll ever be with them because you haven't entered into a common cause pact with them. That pact is to provide optimum conditions for the game of golf to satisfy the players who pay all three of your ways.

It has always been my opinion

that a golf turf manager is much like a general manager, except that he doesn't enter into the foodstuff or pro shop operations. There are some who do, I realize. But just turf management requires much more than mowing and fertilizing the grass. You have to know how to get the money to do it right. You have to know how to train and motivate the people who work for you. You have to know how to get along with the golfers. You have to know how to inspire more of them to come to your course. You have to know how to get to know them so that you're important in their eyes to their golf game. And the list goes on.

These are but a few of the topics we plan to explore in the next year. It would help if we knew what approach to take. What are the specific problems you have in member/superintendent, crew/superintendent, general manager/superintendent, etc., relationships?

We have taken the liberty of turning the READER FORUM CARD around. If you'll look, it is now right besides this column. Write on it and mail it. I'd rather be hated than ignored.

Stir up some controversy. If you don't like something, let somebody know. We will. If you're particularly proud of something, let somebody know. I'd much rather turn this page into an idea, comment exchange than rabble-rouse myself. Let's hear from you.

CL Sulphur Coated Urea The Number One Controlled Release Nitrogen Fertilizer

Net contents

Coated slow release For turf, trees, nursery s For container and green Port officient 4 to 5 mo

an Industries Limite

CIL Sulphur Coated Urea is being tested against other controlled release nitrogen fertilizers at 14 different universities in the U.S. and Canada. Photo above shows one of the test sites with CIL Sulphur Coated Urea treated grass in foreground.

Efficient

Release of nitrogen is controlled by moisture. Temperature and bacterial activity are not important factors. Excess moisture however, does not markedly speed up the release of the nitrogen.

Soil ph does not alter pattern of release.

Effective

Tested on grass plots under scientifically controlled conditions, CIL Sulphur Coated Urea outperformed all conventional slow release nitrogen fertilizers tested, in both the appearance and growth of grass obtained.

CIL Sulphur Coated Urea releases nutrients as soon as it is applied and continues to do so evenly over 4 to 5 months. Result is more complete utilization of nitrogen applied, and no build up of nitrates in the soil

Economical

Low cost per unit of controlled release nitrogen

Background photo: CIL Sulphur Coated Urea prills actual size.

Available in bulk or in 55 lb plastic bags.

Please send me more information about CIL Sulphur Coated Urea. Please advise who can supply me with blended products made with CIL Sulphur Coated Urea. Name.
