

# ROSTER OF GOLF BUSINESS AND TURF ORGANIZATIONS

## A

### American Seed Trade Association

Turfgrass Division  
1030 15th St. NW  
Washington, DC 20005  
202/223-4080  
Dr. Harold D. Loden, Executive Vice President

### American Society of Golf Course Architects

221 N. LaSalle St.  
Chicago, IL 60601  
312/372-7090  
Paul Fullmer, Executive Secretary

### American Sod Producers Association

Association Bldg.  
9th & Minnestoa  
Hastings, NE 68901  
402/463-5691  
Bob Garey, Executive Director

### Aquatic Plant Management Society, Inc.

P.O. Box 06005  
Fort Meyers, FL 33906  
Lou Guerra  
512/349-2174

## C

### Canadian Golf Superintendents Association

698 Weston Rd., Suite 32  
Toronto, Ontario, Canada M6N 3R3  
416/767-2550  
Cheryl Holmes, Coordinator

### Central Plains Turfgrass Foundation

Dr. R.N. Carrow, Secretary/Treasurer  
Horticulture Dept., Waters Hall  
Kansas State University  
Manhattan, KS 66506  
913/532-6170

Dr. Landon C. Miller

Dept. of Horticulture  
**Clemson University**  
Clemson, SC 29631  
803/656-3403

### Club Managers Association of America

7615 Winterberry Place  
P.O. Box 34482  
Washington, DC 20034  
301/229-3600  
Horace Duncan, Executive Director

Division of Plant Industry

### Colorado Department of Agriculture

406 State Services Bldg.  
1525 Sherman St.  
Denver, CO 80203  
R.L. Sullivan, Director  
303/839-2838

### Cushman-Ryan

900 N. 21st.  
Lincoln, NE 68501  
402/475-9581

## D

### Delaware Turfgrass Association

Number 4 Odessa Ave.  
Wilmington, DE 19809  
Harry McSloy

## F

### The Fertilizer Institute

1015 18th St., NW.  
Washington, DC 20036  
202/466-2700  
Barbara Schoen

### Michigan Turfgrass Foundation

Tom Smith  
Michigan State University  
Dept. of Crop and Soil Sciences  
Agribultural Hall, Rm. 323  
East Lansing, MI 48824  
517/353-4417

### Midwest Regional Turf Foundation

Dept. of Agronomy  
Purdue University  
West Lafayette, IN 47907  
317/749-2891  
William H. Daniel, Executive Secretary

### The Musser International Turfgrass Foundation

P.O. Box AA  
College Park, MD 20740  
301/864-0090  
Dr. Fred V. Grau

## N

### National Association of Public Golf Courses

c/o William E. Lyons, President  
Lyons Den Golf  
Canal Fulton, OH 44614  
216/854-9910

### National Club Association

1129 20th St., NW.  
Washington, DC 20036  
202/466-8424  
Gerard Hurley, Executive Director

### National Golf Foundation

200 Castlewood Dr.  
North Palm Beach, FL 33408  
305/844-2500  
Don A. Rossi, Executive Director

### National Institute on Park & Grounds Management

Box 1936  
Appleton, WI 54911  
414/733-2301  
Tom Lubu, Conference Coordinator

### National Recreation & Park Association

1601 N. Kent St.  
Arlington, VA 22209  
703/525-0606  
John Davis, Executive Director  
Marge Westbay, Conference Coordinator

### Nevada Recreation and Park Society

Nye Building, Room 221  
Carson City, NV 89701

### New Jersey Turfgrass Expo

Dr. Henry W. Indyk, General Chairman  
Cook College — Rutgers University  
Box 231, Soil & Crops Dept.  
New Brunswick, NJ 08903  
201/932-9453

### New York State Turfgrass Association

210 Cartwright Blvd.  
Massapequa Park, NY 11762  
516/541-9034  
Anne Reilly, Executive Secretary

### New York Turf & Landscape Association

P.O. Box 307  
Scarsdale, NY 10583

### O.J. Noer Research Foundation

c/o Frank I. Shuman, Secretary-Treasurer  
Green Hill Rd.  
Lumberville, PA 18933

The January issue will cover the Spring preparation of irrigation systems for the coming Summer irrigation season. Assessing and repairing/replacing Winter tree damage will allow you to take advantage of tax breaks, etc.

# C-I-L Sulphur Coated Urea

## The Number One Controlled Release Nitrogen Fertilizer

C-I-L Sulphur Coated Urea is being tested against other controlled release nitrogen fertilizers at 14 different universities in the U.S. and Canada. Photo above shows one of the test sites with C-I-L Sulphur Coated Urea treated grass in foreground.

### Efficient

- Release of nitrogen is controlled by moisture. Temperature and bacterial activity are not important factors. Excess moisture however, **does not** markedly speed up the release of the nitrogen.
- Soil pH does not alter pattern of release.

Background photo:  
C-I-L Sulphur Coated Urea prills

### Efficient Effective Economical

### Effective

- Tested on grass plots under scientifically controlled conditions. C-I-L Sulphur Coated Urea outperformed all conventional slow release nitrogen fertilizers tested, in both the appearance and growth of grass obtained.
- C-I-L Sulphur Coated Urea releases nutrients as soon as it is applied and continues to do so evenly over 4 to 5 months. Result is more complete utilization of nitrogen applied, and no build up of nitrates in the soil.

### Economical

- Low cost per unit of controlled release nitrogen.
- Available in bulk or in 55 lb plastic bags.

# C-I-L Sulphur Coated Urea

The 51st Annual GCSAA Show takes place this month in St. Louis. The February issue will pre-cover the show in detail. Take it along as you visit the trade show and educational sessions or use it as a guide to the marketplace.

rhône-poulenc inc.

# The Chipco® Line. It's growing like grass.

Now you can have a matched set of Chipco herbicides, fungicides, and micro nutrients in your turf maintenance bag. Chipco provides virtually everything you need to keep turf free of troublesome weeds and diseases and promote a good looking, perfectly playable course.

Ask your Chipco distributor about new Chipco® 26019 that outperforms other fungicides with half the number of sprays . . . and Chipco® Ronstar® G that controls crabgrass, goosegrass and poa annua up to 120 days with one early application. And ask him about the advantages of buying everything you need from the entire quality line of Chipco turf products.

Herbicides, spraying and overseeding are the topics this month. Experts on each subject will lend their knowledge to ensure a successful weed eradication and turfgrass seed germination program for 1980.

# Which aeration hole is better for your greens?

The answer, if you haven't already guessed, is the Greensaire II hole. And for good reasons.

One, it's deeper. The primary objective of aeration is to help air, water and fertilizer penetrate the soil. The Greensaire II removes cores up to 3" deep, allowing these vital nutrients to reach the root zone where they're needed.

The fact that there are 36 of these deep holes per square foot means that you also remove more soil. This not only relieves the toughest compaction problems, but it also allows you to replace more of the old, depleted soil.

The Greensaire II hole is precise. It won't affect the roll of a golf ball, so your green is back in play sooner. You can aerate most greens in 45 minutes or less.

And when you use the Greensaire II, you can also use the unique Ryan Core Processor attachment. It catches the

cores, separates good soil from debris, puts the good soil back on top, and bags the debris. You aerate, top dress and collect thatch in one operation.

If you want these same fine aerating qualities, but on a smaller scale, choose the Greensaire 16. It aerates a 16" swath instead of a 24", uses the same selection of tines

and has a convenient windrow attachment that makes core removal easy.

Of course, like all Ryan equipment, these machines are built to last. So when you aerate, don't just scratch the surface. Get the deep penetration you need with the Greensaire II, Greensaire 16 and Core Processor.

Write for your free Ryan catalog today.
