

# CIL Sulphur Coated Urea

## The Number One Controlled Release Nitrogen Fertilizer

### Efficient Effective Economical

CIL Sulphur Coated Urea is being tested against other controlled release nitrogen fertilizers at 14 different universities in the U.S. and Canada. Photo above shows one of the test sites with CIL Sulphur Coated Urea treated grass in foreground.

#### Efficient

- Release of nitrogen is controlled by moisture. Temperature and bacterial activity are not important factors. Excess moisture however, **does not** markedly speed up the release of the nitrogen.
- Soil pH does not alter pattern of release.

Sulphur Coated Urea  
32-0-0

- Coated-slow release nitrogen fertilizer.
- For turf, trees, nursery stock.
- For container and greenhouse soil mixes.
- Safe, efficient 4 to 5 month release for specialty field crops.

Canadian Industries Limited  
London, Ontario N6A 4L6

#### Effective

- Tested on grass plots under scientifically controlled conditions, CIL Sulphur Coated Urea outperformed all conventional slow release nitrogen fertilizers tested, in both the appearance and growth of grass obtained.
- CIL Sulphur Coated Urea releases nutrients as soon as it is applied and continues to do so evenly over 4 to 5 months. Result is more complete utilization of nitrogen applied, and no build up of nitrates in the soil.

#### Economical

- Low cost per unit of controlled release nitrogen.
- Available in bulk or in 55 lb plastic bags.
