# DON'T FOOL WITH MOTHER NATURE

## It's Not Nice... and It's Not Smart.

The synthetically produced fertilizers are OK for awhile...for a quick spurt, but turfgrass professionals are learning from Mother Nature that the synthetics are not as effective over the long run as naturally organic Milorganite. Turf tires and develops a worn out look.

Naturally organic Milorganite provides the nutrients needed for healthy strong turf...And that's the way Mother Nature wants it *ALWAYS*.

**Start your turf *today* on its way to a longer prime of life with Milorganite.**

## MILORGANITE...THE GOLF COURSE CHOICE

**MILORGANITE**

*Milorganite does not burn and is almost impossible to over-apply.*

**MILWAUKEE METROPOLITAN SEWERAGE DISTRICT**

DO NOT USE ON EDIBLE CROPS

## This month's editorial

This year, the January issue will feature the 1981 GOLF BUSINESS GCSAA Showcase. Once again, this will be a complete show issue to carry as you attend, or can be used as an overall business reference for those not attending. Outlook 1981 will take a look at what will happen on golf courses as a new President takes over.

# CHIPCO® 26019

## LONG-LASTING CHIPCO® 26019 IS STRONG MEDICINE.

If you're serious about protecting your turf against diseases, give it your best shot. Spray Chipco 26019 fungicide. Thousands of superintendents have switched to Chipco 26019 in the past two years.

And no wonder. Chipco 26019 gives you the longest residual. You can cut the number of sprays in your program, and that cuts your costs. And Chipco 26019 prevents the major turf diseases with unsurpassed effectiveness. You'll get good results with Chipco 26019 against dollar spot (including benomyl-resistant dollar spot), Helminthosporium (leaf spot and melting out), brown patch, Fusarium blight and Fusarium patch (West of the Cascade Mountains). Chipco 26019 also suppresses grey and pink snow molds. Ask your Chipco distributor or Rhône Poulenc representative about effective, long-lasting Chipco 26019...the strong medicine in turf disease prevention. ## This month's editorial

This month will begin our pictorial identification series with Northern Weeds. We will include the latest research data from scientists across the country exploring control of these pests. Tips on Equipment Calibration will aid in preparation of equipment for the new spraying season. Irrigation Maintenance will help tune-up and avoid costly down time when you turn the water on.

# New EXCEL HUSTLER 261 mows a 60" swath while it moves in a 63" path.

Compare with any other 50" or 60" mower! It's made to order for landscape maintenance contractors, cemeteries, tree-studded campuses, etc.

**The Mower:** New 3-way deck adjusts to side or rear discharge, or mulch. When set for mulch or rear discharge, the whole mower is only 63" wide.

Mows freely between obstacles. Maneuvering is EXCEL-easy. Dual hydros control drive wheels independently — *instant pure motion* at a fingertip touch on twin hand levers.

Each pump, working only half as hard, lasts many seasons longer.

**There's Mower:** Belt drive runs straight from B&S 2-cylinder engine to mowing deck mounted on the same floating frame. No twists to steal power or wear out belt. Shorter wheel base to mow evenly, reduce scalping. Tractor comes with 3-way deck, full safety group.

**And More:** Optional Edger, Catcher/Compactor, and Trailer. Factory-trained service, genuine EXCEL parts through your EXCEL Distributor. Write for his name and free literature, or watch for a field demo.
