

“Regal rye, I presume?”

The best-looking grass in Kansas City can be found, of all places, at the Harry S. Truman Sports Complex. Regal perennial ryegrass can be found here—in the landscaping around Arrowhead Stadium, as well as in the football practice field.

Overseeding the Baron and Ram I bluegrass in this field with a team of perennial ryegrasses, including

Regal, produces a playing surface that withstands the almost daily wear and tear by tough Kansas City Chiefs. The result, according to George Toma, Director of Field and Landscaping Operations, is a truly tough yet beautiful turf.

Don't you have a place for Regal turf-type ryegrass?

This month's editorial

This month will feature an identification series of photographs on Turfgrass Insects. The Masters tournament will be covered, not only from the standpoint of course preparation, but as a tool of recognition for the importance of turfgrass maintenance. Moisture Sensors and their uses for controlling irrigation systems will be explored as research is pointing towards a new era in water conservation.

Monsanto

**When Dave Portz renovated 14 fairways with Roundup®,
the members played the same day he sprayed.**

Dave Portz
Grounds Superintendent
Brookside Country Club
Mecungie, Pa.

Cleaning up a weedy fairway doesn't have to be a slow, messy job for you—or a hardship for your golfers.

Roundup® herbicide helps make renovation fast and efficient—as Grounds Superintendent Dave Portz discovered last year.

“If we had chosen to plow the course under, we would've had to close it,” Dave says. Instead, he applied Roundup on 14 weedy fairways, and reopened the course the same day. While Roundup worked, the members played over the dying turf, with no problems.

The members—and Dave—liked that. They were glad, too, that Roundup won't wash, leach or volatilize to injure desirable plants along the fairway. Dave simply took precautions against spray drift.

This year, reach for Roundup to control many tough weeds. It can make turf renovation fast and efficient for you—and leave a lot more playing time for your golfers.

For literature, call 1-800-621-5800, or in Illinois, 1-800-972-5858.

**There's never been
a herbicide like this before.**

This month's editorial

This issue will feature number one of a three-part series on **Maintaining Equipment**, will emphasis on preventative maintenance. The **Maintenance Facility** will feature ideas to incorporate when building new, and ideas that can be used to modernize an existing maintenance building. **Handling Replacement Parts** will provide an insight to replacement parts that should be stocked on the course, what packages are available from suppliers, and what you should do in an emergency down situation. The pictorial will feature **Aquatic Weeds**. **GOLF BUSINESS South** will offer tips for selecting equipment for the South, where it is used year-round.

Groundsmaster 52.[®] From a 52" offset deck to hydrostatic drive, it's designed to be a Professional.

Donaldson air cleaner for better engine protection.

Deck up front, steering in back for more maneuverability.

Hydrostatic drive for smooth, one-pedal control of forward and reverse.

P.T.O. shaft eliminates belts, simplifies change of accessories.

Deck raises hydraulically for fast, easy transport, even over curbs.

Wide stance wheels for excellent stability.

Offset deck for trimming around obstacles, along curbs, under shrubs.

You're looking at just a few of the features that make this versatile midsize rotary mower so durable and productive.

We don't have room enough to show them all.

For now, we'll tell you the Groundsmaster 52[®] mows like a garden tractor, trims close like a walk mower and lets one man do both. With optional attachments, it's a year round workhorse with everything from vacuum to snowblower to V-plow to broom.

Above all, it's engineered for professional use by the

Professionals in turf care products.

Want a demonstration of the Groundsmaster 52[®]? Or our Groundsmaster 72[®] that mows up to 3.7 acres an hour without losing its cool? Call your Toro distributor. Or, mail the coupon.

This month's editorial

The second part of Maintaining Equipment will focus on maintaining mowers, from the small rotary push-type, to hydraulic fairway units. Once again, we will interview officials from turfgrass seed companies and present our Seed Forecast. The Role of Soil Amendments and Aerators for alleviating compaction will be featured.

Monsanto

For 10
full years,

the South's
most
successful
blends.

**Medalist[®]
Brand
Winter
Overseeding
Blends.**

Northrup King introduced them 10 years ago and by 1973 they were keeping greens and tees green and healthy all winter long at over 250 Southern courses. Today, Medalist blends are still used at 90 percent of those courses. And another 215 Southern courses have discovered Medalist blends, too.

That's success.

All those golf courses use Medalist blends for plenty of hard-nosed reasons. Medalist blends establish rapidly. They mow beautifully. Their transition characteristics are excellent. And they're exceptionally reliable.

The latest Medalist blend is Medalist 6 and it's a standout. That's why it will help keep more and more greens in top shape all winter long. Ask your Northrup King man how to make your course even better. He'll tell you about all the Medalist blends, including Medalist 6.

And he'll be more than happy to pour you some.

For more information, write: Medalist Brand Formulas, Northrup King Co., P.O. Box 370, Richardson, Texas 75080. Or P.O. Box 583, Atlanta, Georgia 30329.

This month's editorial

Tractors on the Golf Course will be a market guide and will include specifications for comparison buying. Large equipment will be the theme, as the third part of our maintenance series will be on Maintaining Large Equipment. An article on whether to Replace or Repair? will offer guidelines to decide if maintenance is worth it. GOLF BUSINESS South will present Timing and Methods for Overseeding cool season grasses into warm season.

Model 68" Triplex

The beauty of a National is only in the eye of its user!

Ask the superintendent who uses a National... he'll tell you it's a quality-built, rugged machine with a no-nonsense design that makes maintenance easier and faster. Field reports show that National mowers are one-third to one-half the cost of maintaining competitive models. Just one example of National's commitment to build a mower that can be maintained easily and inexpensively is the use of standard, off-the-shelf belts. That means *there's no down time* waiting for a special, high-priced

replacement which is only available from the manufacturer.

Ask the greens committee what's beautiful about a National. They'll tell you it's the "bottom line." Compare it yourself. You'll find a *National offers a lower initial cost* than comparable, competitive models.

Ask the club membership about the fuel savings. In an area of exact size and growth, performance tests proved that National reel mowers used from 20 to 42 gallons less than two other nationally known, hydrostatic-type rotary mowers. Consider what that means in dollar savings in just one year!

In these days when purchase price, fuel economy, continuous performance and long life are most important, look to National to do more work, with easier and faster maintenance, over a longer, much longer period!

Call for a demonstration soon.

This month's editorial

This month will feature Superintendents and courses across the country as a compendium of ideas for Housekeeping on the Course and Ideas for Golf Car Paths. We will make it easier to get rid of those problem drainage areas with a how-to feature on Installing Drainage Tile. The Seed Harvest will show the path of turfgrass seed from harvest to bag.
