

"The church board voted unanimously to get a John Deere because it's the best tractor for the money. With my blessings."

Father John Poerio,
St. Lawrence Parish, Raymond, LA

St. Lawrence parish has a lot of grass to mow (over 12 acres), but not a lot of money to spend on mowing equipment.

So when the time came to buy a tractor, Father Poerio and the church board considered the alternatives very carefully.

They decided to get a John Deere 22-PTO-hp 850.

"Being a John Deere, we knew it would be powerful enough to handle a big mowing job," said Father Poerio.

"And being a diesel, we figured it would be economical to operate, too!"

Not too big, not too small.

Which, of course, is what John Deere 'little-big' tractors are all about.

The 22-PTO-hp 850, 27-PTO-hp 950 and the new 33-PTO-hp* 1050 are simple, reliable tractors at an affordable price.

Big enough to handle mowing jobs for schools, parks, cemeteries, golf courses, churches and the like.

Yet not so big that you're paying for more tractor than you really need.

Big tractor features.

'Little-big' tractors have features you usually find on much larger tractors.

Like a water-cooled diesel engine with power enough to run a rotary mower day after day, year after year.

A well-spaced 8-speed transmission that matches up to just about any job you need to do.

A differential lock. Category 1 3-point hitch. 540-RPM rear power takeoff. And variable wheel spacing.

Plus a family of more than 20 tractor-matched implement options. And your choice of either bar or turf-type tires.

Tractors you can believe in.

Of course, like all John Deere products, 'little-big'

tractors are built to last.

"All you have to do is look at how long John Deere Tractors hold their resale value," says Father Poerio, "and you know they've got to be good!"

Ask your John Deere dealer for a demonstration. Feel for yourself how solidly they're built. Listen to how smoothly they run.

We think you'll see why Father Poerio and the church board decided on a John Deere.

Nothing runs
like a Deere®

For more information, write John Deere, Dept. 63, Moline, Illinois 61265.

*Maximum PTO horsepower at 2600 engine rpm for the 850 and 2400 engine rpm for the 950 and 1050 by official test.

RYEGRASS

the all around performer

Adaptability and versatility have made ryegrass the world's most widely used grass.

Now, with the emergence of the turf-type proprietary varieties, ryegrass can fill every need on any course where cool season grasses flourish or on Southern courses where the native grasses are winter dormant.

Long ago the public varieties found a permanent home where color is important and there's a need for an inexpensive, durable turf.

With the advent of the finer-bladed varieties, the

domain of ryegrass has expanded and it is now widely used on roughs and fairways, tees and greens.

On greens it has proven its ability to thrive when cut to putting green heights and survive nicely throughout chilly Southern winters.

Both the public and private varieties will germinate in a matter of days, respond rapidly to fertilization and produce a turf that never needs pampering. Ryegrass — the all around performer.

BEAT INFLATION OWN NUMISMATIC SILVER DOLLARS

Numismatic uncirculated coins have actually outperformed every type of investment for the past 20 years. Silver coins from America's historic past in brilliant uncirculated condition consistently increase in value 20% or more every year. In 1970, a paper and a silver dollar each bought 3 gallons of gas. Only 9 years later, a paper dollar hardly gets you 1 gallon but a numismatic uncirculated silver dollar could buy you a few tankfuls. People in the know are investing a good part of their savings in collectables of all types, numismatic coins are the no. 1 choice. For free brochure and details, call our 24 hr. toll free number.

FUERST F-L-E-X-I-B-L-E TINE HARROW®
makes golf course maintenance easier.

Does a lot of jobs mechanically that you now do by hand or let go because of lack of labor. Breaks up soil cores after fairway aerification. Gets leaves out of low spots. Rakes roughs, wooded areas, traps. Reduces hand raking to absolute minimum. Removes thatch from existing sod. Works in seed and fertilizer. Smooths areas where frost heave or mole runs occur. Maintains gravel drives, parking areas, and more. Acclaimed by many leading golf course and park superintendents.

The Furst F-l-e-x-i-b-l-e Tine Harrow can be set for deep or light penetration or a smoothing drag mat. Flexes to cover every inch of the ground. Ruggedly built to last for years. Nothing to service or get out of order. 4½ to 24 ft. widths.

Stop at Booth # 2134 for "Free Tips" on tested uses and ask about our "Show Special"

A BEAUTIFUL LIE.

A BEAUTIFUL RYE.

There's no doubt about it. REGAL is the new turf-type perennial ryegrass that combines color, vigor and density for an elegant turf.

REGAL's dark green, fine-textured leaves look beautiful alone, or blend well with other turf-type ryegrasses. It has excellent tillering characteristics, and during periods of transition with bermudagrass, helps to maintain a lush, green, uniform turf.

And REGAL cuts clean, for a beautiful lie on tees, greens, fairways and roughs. Without ragged edges, or grainy areas.

Try REGAL—bred for rapid germination, exceptional vigor, density and persistence. Good disease resistance, too.

If you'd like more information on REGAL, contact North American Plant Breeders. P.O. Box 2955. Mission, Kansas. 66205 8-5256

First in the science of seeds.™

Circle 107 on free information card

REGAL

the ryegrass that gives your course a beautiful edge.

Presenting the for your

Greensmaster 3®

Isolated cutting heads give each green uniform cutting height, appearance, playing characteristics.

Options include reel shut off kit, quick height of cut adjustment, 3 rollers, comb, brush/scraper.

Spiral thatching blades for more efficient thatching and throwing into baskets.

Quick disconnect reel motor means easy change to spiking or thatching reels.

Turf Pro 84™

All wheels are drive wheels for excellent traction and maneuverability.

Reels with independent suspension follow ground contour, improve quality of cut.

Hydraulically powered reels and wheels eliminate belts and gears.

Reversible reel motor permits "backlapping" for reduced sharpening frequency.

You're concerned with not only the appearance of your course but every facet of its playability.

So we're letting you in on some ways we engineer turf care products with you in mind.

Consider this Toro foursome of Professionals.

Our Turf Pro 84™ is an all hydraulic triplex with the ability to give you the right clip for each desired height of cut and type of grass.

For your greens, our Greensmaster 3® still has no equal. Because no other greensmower has cutting heads isolated from the traction heads and grass baskets.

And meet our Sand Pro®.

Toro® Professionals course.

HTM-175™

Exclusive reel couplings mean more freedom to follow ground contour for finest quality cut.

Gentler on the grass with custom designed reel units that weigh 110 lbs. less than our wheel drive gangs.

Reliable 4 cylinder diesel engine with 236 cubes of lugging power for hills and heavy cutting.

Simpler to drive with automotive steering out front. Minimizes operator training.

Maneuvers completely around in its own length for raking traps and tight "peninsulas".

Sand Pro®

Implements raise and lower hydraulically for greater control.

Special ATV high flotation tires only 4 psi for excellent traction in sand.

Hydraulic motors on all wheels. No gears or belts.

The only trap rake with total hydraulic power. Plus the lower upkeep, longer life and superior performance that go with it.

Finally, the ultimate in precision. Our HTM-175™.

Its superbly balanced cutting units can match the needs of your course with a smooth, exacting cut down to 3/8 of an inch.
