

An untold story of compatibility

Turf managers know that Penncross and Emerald—the world's two great bentgrasses—are sterling solo performers, but a handful of canny Superintendents have discovered something new about this outstanding pair.

They've found that Emerald and Penncross make one masterful mix for the re-seeding of old, established golf greens.

HERE'S WHAT THREE SUPERINTENDENTS HAVE TO SAY

"I've been overseeding my greens with a mixture of Emerald and Penncross

because the durability and wear-resistance is outstanding, and the putting surface texture is exceptionally smooth. I also like the savings that result from mixing the two."

Dave Jones, Supt., San Diego Country Club, Chula Vista, California

"Emerald and Penncross are unusually compatible and disease-resistant. In combination they wear well and make very good recovery from injury. Combining them helps me keep costs at a realistic level!"

Dave Mastroleo, Supt., Hillcrest Country Club, Los Angeles, California

"I have a three-year old nursery of

Emerald bent that is maintained exclusively to repair damage to my Penncross greens. It's a perfect solution because the texture and color of Penncross and Emerald are remarkably similar."

A. B. Munez, Supt., Southhills Country Club, West Covina, California

P.S. Emerald is also an ideal choice for both tees and fairways. It will provide your golfers a nice, tight lie and does a fine job of healing scars.
