

WHEN OUR GAS GOLF CARS TAKE THE COURSE, THEY COME UP WITH THE RIGHT NUMBERS.

AMF Harley-Davidson® Gas Golf Cars produce the right numbers on the bottom line—to generate more profit and a better return on investment for your golf course.

That's why we've been a leader for 17 years. But you can't stay ahead by standing still. So we work overtime to improve our fine quality cars.

Take our 250 cc air-cooled engine. One of its major advantages is the simplicity of its design.

We do things like redesign the crankshaft to increase dependability.

Or we redesign the governor control for consistent vehicle performance.

Fact is, we're so confident of this engine, it comes with a 2 year parts warranty on key engine components and the primary transmission. No one has anything like it.

No one has anything like our styling, either. AMF

Harley-Davidson golf cars look more prestigious. Their classic look enhances the image of your course with your players.

But there's more that makes our golf cars exceptional values.

Our hinged fiberglass body makes servicing fast and easy.

Our 3-wheel cars have a wraparound front bumper with 2 touch points for added stability. It's exclusive with us.

But then, the dependable quality of these golf cars is a proven fact. They have the industry's highest trade-in value.

And most important of all, our cars are sold, leased and serviced exclusively by your AMF Harley-Davidson Golf Car Dealer.

He's dedicated to improving your return on investment—better numbers, for more black ink on your bottom line. We know these new gas golf cars go a long way to proving his point.
