

SWINGING IN THE RAIN

MODERN JAZZ

Safe-T-Lawn proudly announces its jazzy new line of irrigation products for 1981 — an out-of-this world modern orchestration from the innovators of the pop-up sprinkler.

At Safe-T-Lawn, we are constantly striving to improve our design and production techniques to offer the finest and least expensive products to the consumer. Yet, we insure the highest profit to our distributors. We think you will enjoy a swinging rendition for 1981.

CONTROLLED TEMPO

Now you can control it all with Safe-T-Lawn's totally new, full line of irrigation controls for residential, light-commercial, commercial and golf applications. Now that's sophisticated swing, designed with the distributor in mind!

SWEET HARMONY

No matter which totally controlled product line you choose, brass or plastic, we offer the finest in the market place — all backed by Safe-T-Lawn's international reputation of manufacturing quality irrigation products. So swing with us in '81, and let the profits rain.

SAFE-T-LAWN

THE GT-7. ITS CARRYING CAPACITY IS NO EMPTY CLAIM.

No other golf utility vehicle on the market has a bigger carrying capacity than the GT-7. It'll haul a 1500 pound payload at up to 24 mph, without so much as a complaint. And its 19 cubic feet of cargo area can save you extra trips.

It's also available with a full line-up of accessories for aerating, seeding and spreading, top dressing or spraying.

The GT-7 is easier to service, has undentable fenders and a diamond steel rear bumper. Yet it

sells for about the same price as the leading competitor.

But don't just believe our claims. For a demonstration on your course, just call your E-Z-GO Branch Office or Distributor. They're in the Yellow Pages. Or call us at (612) 542-0516.

How can you cut more grass per gallon? Get yourself a Brouwer.

Run a 7 gang unit, cut up to 7 acres per hour with a 30 HP tractor.

Brouwer's unique Positive P.T.O. Drive requires less horsepower than conventional wheel drives, increases fuel economy, and successfully operates in varying grass conditions. The lightweight, high-stress steel frame combined with the simple, "no-wheel and gear" mowers minimize flattening and avoid wheel tracks.

Brouwer 3, 5, and 7 gang mowers are simple, easily transportable, remarkably maneuverable and exceptionally economical and versatile.

THE NEW BROUWER HYDRAULIC LIFT MOWERS ADD ANOTHER TIME SAVING INNOVATION AT A VERY LOW COST.

For complete details on the Brouwer line of mowers, write for our free brochure.

More precise holes. More precise rolls.

Shown with optional windrow.

Removes uniform cores
up to 3" long

Shown with optional
core processor.

That's the Greensaire[®] difference.

Precision is the name of the game on the greens. When it comes to greens aeration, the name associated with precision has been the Ryan Greensaire aerator since 1958. The self-propelled Greensaire II for 1981 continues that tradition.

The tines of the Greensaire II cleanly penetrate the turf in an up-and-down motion, removing 36 cores—up to 3" long—from every square foot of turf. Yet the process is so precise that the holes it makes should not affect the true roll of a ball.

Powered by a tough 8-hp engine, the Greensaire II takes a full 24" swath and lets you aerate up to 8,000 square feet per hour. And, with four sizes of interchangeable tines, you can achieve precisely the amount of aeration your greens need.

What's more, by attaching the optional Core Processor, you can separate and collect the thatch, and return the soil as top dressing—all in one operation.

For the same precision in a smaller size, choose the self-propelled Greensaire 16. It offers the same choice of tine sizes, and can aerate up to 4,000 square feet per hour.

Healthy greens aeration. That's the Greensaire difference. To find out why the Greensaire is the ultimate in greens aeration, complete and return this coupon today.
