

Grey Leaf Spot

Pennway

Special

Severe Drought

If your fairway suffered the devastating effects of drought, it can look this great when you renovate with Custom Pennway from Tee-2-Green.

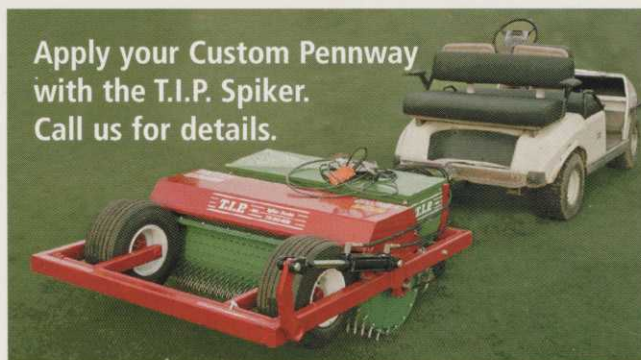

The severe drought coupled with grey leaf spot damage provides superintendents the opportunity to convert *Poa annua* infested fairways to creeping bentgrass. Tee-2-Green™ has developed the Custom Pennway blend expressly for this purpose, and as identified below, contains PennLinks and drought tolerant Seaside II.

Custom Pennway blend:

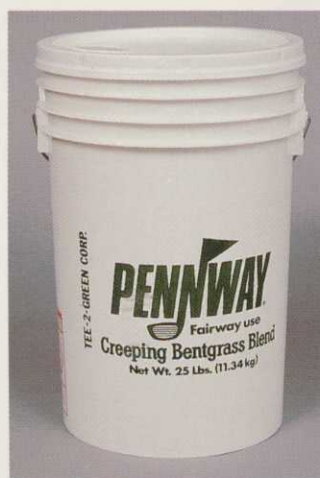

- 11% Penncross
- 19% PennLinks
- 10% Seaside II
- 9% Penneagle
- 51% creeping bentgrass

Order your Custom Pennway today!

Circle No. 103

Apply your Custom Pennway with the T.I.P. Spiker. Call us for details.
