

# SOME WETTING AGENTS ARE ALL TALK.

## CASCADE™ PLUS IS ALL RESULTS.

*(And we have the research to prove it!)*

When it comes to product performance, some wetting agents have a lot to say but nothing to back it up. Then there's Cascade Plus, scientifically proven to deliver real results. Cascade Plus will give you firmer, faster playing surfaces, deeper healthier root systems, improved stress tolerance and better drought resistance. In fact, independent university research shows that untreated hydrophobic soils required more than twice as much irrigation to reach volumetric water content levels as soil treated with Cascade Plus.

You'll enjoy more efficient irrigation and enhanced water management, with better water infiltration. And you'll see a noticeable reduction in the effects of localized dry spot. Altogether, with Cascade Plus you'll get longer-lasting improvements in turf color and quality with excellent pre-stress conditioning. And that's really something to talk about.

Call 800-323-6280 for more information or to request a copy of the research that proves Cascade Plus is everything we say it is.
