

MARRY THE WRONG ADJUVANT WITH YOUR SPRAY CHEMISTRY AND YOU'RE HEADED FOR TROUBLE.

Choosing the right adjuvant makes a big difference in pesticide efficacy. Marry the wrong adjuvant with your spray chemistry

and you may decrease pesticide performance, increase phytotoxicity, or both. At Precision Laboratories, our adjuvants work to maximize pesticide performance, your performance and your budget. We have manufactured and tested adjuvants for more than 20 years, and we know what it takes to pair the right adjuvant with the active ingredients that benefit you and your spray program. That's why superintendents choose Precision Laboratories, the adjuvant experts.

For a free Adjuvant Use Guide and product guide call 800-323-6280, or email info@precisionlab.com.
