PRODUCTS & SERVICES

◀ Aerator

Otterbine introduces the Aqua Series Fractional Aerator: a cost-effective and energy-efficient one-fourth horsepower and one-half horsepower aerator. Each unit comes with two spray patterns, the Aqua Gem and Aqua Blast, and a two-year warranty. The Aqua Series primary feature is an air-cooled motor, which limits the hydraulic loss associated with water and oil-lubricated motors.

For more information, contact www.otterbine.com.

▶ Ball washers

Standard Golf Co. introduces its Premier and Medalist Ball Washers, designed with sharp looks, an easy-to-use agitator, and a cast aluminum case and top for durability. The two washers are part of the company's Tradition Series Ball Washers.

The larger of the two,

the Premier Ball Washer features a spiral plunger for quick ball washing and can hold seven pints of washer fluid. The Premier's internal overflow and large drain plug are designed to make maintenance easier. For more information, contact 866-743-9773 or www.standardgolf.com.

Bayer announces winner

Shane Wright, superintendent at BallenIsles Country Club in Palm Beach Garden, Fla., is the winner of the Revolver Sweepstakes sponsored by **Bayer Environmental Science**. Selected in a random drawing, Wright received 200,000 Accolades points to use toward a selection of rewards prizes. "I'm thinking of purchasing a laptop computer with my

points." The Revolver Sweepstakes was open to Southern superintendents who purchased Revolver herbicide, which removes cool-season grasses from warm-season grasses.

Turf covers

GreenJacket offers its Winter Turf Protection system called GreenJacket. It's an engineered, triple-laminated, high-density, impermeable, one-piece, polyethylene sheet.

Its construction allows the turf underneath to be protected from the harsh conditions of winter. By using either the patented insulated or uninsulated GreenJacket, the technology will help the turf underneath resist moisture and large temperature fluctuations.

For more information, contact 888-786-2683 or www.greenjacket.com.

The Advanced Method for Managing Your Most Important Asset... Your Greens

"The Advanced Aer sensors and sub-surface aeration system give us the information we need to keep the turf at its healthiest and the tools to create playing surfaces that are firm, fast and true."

Paul R. Latshaw, Former Golf Course Superintendent
Augusta, Congressional, Oakmont, Winged Foot and Riviera

Greens are the most valuable asset of any golf course. Advanced Aer's patented subsurface aeration system gives you what you need to manage both the health and playability of your greens.

The industry's premier sensor-based technology and user-friendly software provides a steady stream of real-time data, giving you a complete picture of every detail of a green's soil profile. This gives you the ability to monitor and control the optimal oxygen, moisture, temperature and salinity levels in the root zone, helping you to create and maintain truly great greens.

A husband and wife are on the 9th green when suddenly the wife collapses from a heart attack. "Help me dear," she groans to her husband.

The husband runs off to find a doctor, and soon returns, picks up his putter, and lines up his shot. His wife raises her head off the green and stares at him. "I'm dying over here and you're putting?"

"Don't worry dear," says the husband calmly. "I found a doctor on the second hole and he's coming to help you."

"Well how long will it take for him to get here," she asks feebly.

"No time at all," says her husband, practicing his stroke. "Everybody's already agreed to let him play through!"

Out of Bounds

■ SOMETHING COMPLETELY DIFFERENT

PEZ

Princess Leia and Batman, perched on high, look down on my desk. While they are surrounded by various gee-gaws, trinkets and talismans, the fair princess and Dark Knight stand out, not only because they are taller than the others, but because they sport slits in their throats that dispense rectangles of fruity pleasure.

Of course, we're talking about the inordinately dorky, but supremely endearing plastic dispensers of PEZ, which have delighted children for ages and have created some passionate adult devotees well.

In 1927, an Austrian named Eduard Haas III created a candy/breath mint designed as a substitute for smoking. He called the mints PEZ after the first, middle and last letters of the German word for peppermint (pfefferminz). They came in a tin, much like Altoids do today. In the 1940s, the company introduced the more familiar looking "hygienic dispensers" designed to look like cigarette lighters. However, in 1952, the company expanded beyond Europe and brought PEZ to America, complete with the cartoon-character head dispensers and a new, fruity taste that has carved out a unique spot on the American sweet-tooth for the past 50 years.

Since then, the company has created more than 500 different dispensers, covering characters from Bullwinkle and

AN AUSTRIAN INTRODUCED
THE WORLD TO THE CANDY
AND CONTAINERS – AND
TOOK IT BY STORM

BY MARK LUCE

Teenage Mutant Ninja Turtles to Asterix and Zorro.

Of course, they aren't all tied to cartoons or products, as PEZ has made series of Santas, bunches of bunnies, covens of witches, a space gun, a psychedelic eyeball in a hand (the '60s, for sure, man) and even a plethora of dinosaurs called "Pez-a-saurs." With nearly 3 billion of the candies consumed in 60 countries a year, the PEZ phenomenon shows no signs of slowing.

Giggle all you want, but the prices for some of the most rare containers will make your jaw drop. In the 1970s PEZ made a dispenser called "Make a Face" that contained 17 small parts so the children could create different faces on the dispenser. It shortly became clear that the removable face parts presented choking hazards, and the company quickly yanked the dispensers from the shelves. If you are lucky enough to have one, however, it's worth anywhere from \$4,000 to \$5,000. A rare bride and groom set from the 1960s is worth upwards of \$3,500.

There exist three PEZ collectors newsletters, several books and price guides. Countless numbers of local and regional clubs not only sponsor conven-

LISA LEHMAN

tions all over the country, but also a PEZ cruise that launches this month. Yes, you too can join other PEZ Heads on a four-night trip from New York to Halifax, Nova Scotia and back. The trip is a compendium of everything PEZ, including scavenger hunts, bingo, trivia, and more wheeling and dealing for dispensers (among the true PEZ believers) than you could possibly imagine.

If you are a huge fan of the tablets themselves (made a plethora of unpronounceable ingredients that it's probably better you don't know exactly what they are), you will want to trek to the Burlingame Museum of Pez Memorabilia in Burlingame, Calif., (just south of San Francisco). For \$3, you can see more than 500 PEZ dispensers and scads of related PEZ memorabilia. The museum claims to have one version of every PEZ dispenser ever made.

Last month, the PEZ company introduced a new flavor: PEZ Cola, which should be on the shelves in local stores now. To that, and all things related, we can only exclaim, "How PEZ-tacular!"

Mark Luce is a freelancer who lives in Lawrence, Kan., where he longs for a Bullwinkle Pez dispenser.

GOLFDOM (ISSN 1526-4270) is published monthly by Advanstar Communications Inc., 131 W First St., Duluth, MN 55802-2065. Subscription rates: One year \$30 (U.S. and possessions), \$49 (Canada and Mexico) and \$78 (all other countries).
