Product focus:

Founded more than 90 years ago in Cedar Falls, Iowa, Standard Golf is the world's leading manufacturer of golf course accessories and maintenance equipment tools with its products sold by more than 250 distributors on six continents. From its new Harvester™ Ball Picker, the only gang picker in the world that easily goes forward and backward without tangling or damaging the gangs, to its Smart-Fit™ Cup and Ferrule System, preventing flags from leaning, rotating or walking out of the cup, Standard Golf provides only the highest quality products for its customers.

Manufacturing facilities:

Standard Golf manufactures and distributes its products from a 110,000 square-foot facility located in Cedar Falls, Iowa.

Technical support, sales, training and customer service:

Standard Golf markets its products through authorized distributors in all 50 states. Standard Golf also offers direct factory service through its SG Express program. This program allows customers to call in or e-mail their order and it will be immediately processed through the customer's designated distributor. In-stock items will be shipped within 48 hours. To place an order, customers may either call Standard Golf's toll-free number, 1-866-SG-EXPRESS, or visit their Web site, www.standardgolf.com. Standard Golf's online ordering service is available to customers 24 hours a day, seven days a week.

Major product Lines:

Standard Golf's extensive range of accessories, many of which can be customized, include flags and flagsticks, bunker rakes, ball washers, course information signs, cups, litter receptacles and yardage markers. Standard Golf's line of maintenance tools for the landscape, lawn care and sports turf industries feature turf repair tools, roller squeegees, top dressing brushes, hole cutters and soil profile samplers.

Syngenta Professional
Products

syngenta

Product focus:

At Syngenta, we invest heavily in research and development – a commitment that allows us to constantly enhance our offerings to meet the emerging needs of the modern golf-course superintendent.

Manufacturing facilities:

Syngenta operates several manufacturing facilities and formulation facilities in the United States. Syngenta also contracts numerous formulation and packaging facilities. These state-of-the-art facilities manufacture many of our herbicides, fungicides and insecticides. Contract formulation and packaging allows rapid response to changing needs.

Technical support, sales, training and customer service:

In addition to our proven portfolio of products, Syngenta also offers:

- A well-trained and experienced staff of sales representatives, who are capable of consulting with customers to solve problems, and who work in partnership with a nationwide network of full-service distribution partners;
- A staff of field technical managers who assist with problems and issues that our customers might face in the field;
- The Customer Resource Center (CRC), which provides customers with quick and easy access to a wealth of knowledge about Syngenta products and services;
- GreenCast (www.greencastonline.com), an easy to use web-based technology that provides superintendents with customized weather reports, disease outlooks and pest alerts specific to their area;
- The GreenPartners program (www.greenpartners.com), which allows loyal customers to accrue points with each purchase of Syngenta products, to be redeemed for business tools.

Major product lines:

Syngenta offers some of the industry's most effective products in each of the four major

categories: fungicides, herbicides, plant growth regulators and insecticides. A few of our products include:

Heritage TL fungicide. Designed exclusively for the turf market, Heritage TL (Turf Liquid) offers control of the same turf diseases as the original water dispersible granule formulation of Heritage, but with enhanced efficacy and application flexibility. Heritage is the only systemic strobilurin available to the turf market, resulting in the longest application interval of all strobilurin fungicides — up to 28 days of outstanding preventive control of more than 25 diseases on turfgrass.

Primo MAXX® plant growth regulator targets the part of the plant which inhibits vertical growth while enabling rich color, lateral stems and root mass development. The end result is a healthier, more durable blade with a higher tolerance to weather extremes.

Daconil fungicide featuring SuperWeatherStik. Daconil fungicide “sticks and stays” up to 21 days. Only Daconil contains Super WeatherStik, delivering the longest-lasting protection you can get from a chlorothalonil fungicide.

Built-in formulation surfactants enable Daconil to remain on the plant longer, even after rain and irrigation.

Monument herbicide, for use in warm-season turf, provides versatile post-emergence weed control in Bermudagrass and Zoysiagrass.

A sulfonylurea herbicide, Monument demonstrates excellent control of all major sedges, oxalis, green kyllinga and various other weeds in warm season turfgrasses. In overseeded Bermudagrass, Monument can be used to remove *Poa trivialis* and/or perennial ryegrass for enhanced spring transition.

Product focus:

A detail-oriented entrepreneurial sign company, TTG Custom Signage (TTGCS) is a pioneer in golf course sign design. Its principals have spent the last decade gaining industry experience and developing a keen understanding of the needs and challenges facing golf course managers, superintendents, and owners. The company's unique

2005-2006 pricing strategy, based on research conducted throughout the United States and Canada, offers 10" x 6" Genuine Granite Yardage Plates to courses for only \$19.99 – nearly 30 percent lower than its closest competitor. The company's

eight-week order-to-delivery turnover time and flat rate shipping of \$150 for orders over 100 granite pieces, and free shipping for complete course orders anywhere in North America, have made them an industry leader.

TTGCS's staff and owners have worked with more than 200 North American golf courses and continue, from concept to design, to actualize exquisite signage solutions for their clients while demonstrating inspired artistic ability.

Production facilities:

TTG Custom Signage is in the fortunate position of owning its own granite production facilities. This facility was designed and built specifically around the manufacturing of granite signage and markers. Just 15 minutes from the Canadian-U.S. border, the location is perfectly situated to serve both the U.S. and Canadian golf and outdoor leisure markets. The facility has the capacity to produce

up to 800 yardage markers every day, so customers can be assured that their products will be delivered in good order and on time, every time.

Technical support, sales and customer service:

In addition to our friendly and knowledgeable sales and support staff, our customers benefit from an industry leading design and graphics team, and the international distribution capabilities of a world-class freight partner in Yellow Transportation. Whether our customers order a single sign or outfit a complete course, the order will be handled with the care and professionalism that continues to set TTG Custom Signage apart.

Major product lines:

Granite, bronze, aluminum and iron signs.

Corporate profile:

The Toro Company (NYSE: TTC), with \$1.6 billion in sales annually, is a leading provider of outdoor maintenance and beautification products for home, recreation, and commercial landscapes around the world. Together with its distributors, Toro provides innovative products, agronomic expertise and exemplary service that helps consumers and professionals maintain their landscapes.

Product focus:

Toro has been a leader in the golf industry with innovative products and services for you. From the green to the rough to the bunker, we support agronomic excellence in all areas of the golf course. Revolutionary designs include greensmowers that cut as low as $\frac{1}{16}$ th of an inch, rotary mowers that stripe the rough, and the most productive and efficient walking aerator on the market. Irrigation and water management is more important than ever and we have the systems, controllers, sprinklers and valves to fit your needs. Toro Professional Services help you manage your course and your business. From financing to training, today we offer services to enhance not only the performance of your Toro products, but also your bottom line. Delivering more of what you want, that's Toro.

Manufacturing facilities:

Toro® irrigation products are manufactured in El Paso, TX, and Juarez, Mexico, while the computerized irrigation central control systems are configured at Toro NSN® in Abilene, TX. All Toro utility vehicles, sprayers and golf course mowing equipment are produced in Tomah, WI.

Technical support, sales, training and customer service:

You can count on Toro and its international distributor network for support with sales and industry-leading professional services including technical support and training for equipment and irrigation maintenance. Toro NSN offers worldwide irrigation control system support 24-7, technical training to subscribing superintendents, and new web-based irrigation training to fit your schedule and your budget. In addition, Toro offers technical training classes for golf course technicians at its training facility in Bloomington, MN. Look to www.toro.com for operators manuals, service manuals, interactive product manuals and parts look up capability.

Major product lines:

Toro offers a complete line of turf maintenance equipment including Reelmaster®, Greensmaster® and Groundsmaster® mowers, SitePro® and E-OSMAC® central irrigation control, MultiPro® sprayers, 800S Series sprinklers, gas and electric Workman® utility vehicles, ProCore® aerators, Pro Sweep® core collectors, Sand Pro® bunker rakes and a full line of debris equipment. Key professional services include Toro Financing to acquire the right equipment when you need it and Toro Protection Plus, the extended service protection for New and PreOwned equipment, to buy with confidence and peace of mind.

Count on it.

Staff:

John M. Beattie, President

Marilyn Beattie, Sales Manager

Product focus:

Trion has devoted the past 15 years to bringing a high level of efficiency and safety to turf maintenance facilities worldwide. It all started with Trion's development of the first service lift designed specifically to raise three- and four-wheeled mowing equipment. That lift soon came to be known as a "turf equipment maintenance workstation," and eventually was designated the "Pro-M" workstation. Today, Trion offers a large variety of labor-saving tools that have dramatically improved the speed and precision of routine maintenance tasks. Product research and development has always been focused on the needs of turf maintenance professionals, and continues today with the introduction of new product additions and lift accessories. Many customers take advantage of Trion's "system packages" that provide a custom collection of related products at substantial discounts.

Manufacturing facilities:

All Trion products are built with pride at our 9,000-square-foot manufacturing plant and corporate offices in Colorado.

Technical support, sales, training and customer service:

Trion is a factory-direct company providing customers with access to sales and technical support personnel. All Trion lifts are labeled with a toll-free number for quick reference.

Major product lines:

Trion's Pro-M workstation is the focal point for centralized efficiency in the turf maintenance shop. The DL1300 Lift Table offers portability for transferring mower components between the workstation and the work bench or grinder. Other accessories include attachments to raise a variety of walk-behind mowers and lift-mounted accessories for easy access to power tools, inspection lighting and compressed air at the lift. There are even special lift accessories like the self-storing tool bar extensions that quickly and simply modify the workstation's capacity for raising long wheel base vehicles, including trucks.

Duane Klundt,
Western Marketing Manager

Vanessa Cox,
Eastern Marketing Manager

Product focus:

Turf-Seed, Inc. is a family-owned company dedicated to the philosophy that every grass has its home. Affiliate company Pure-Seed Testing, Inc. collects plant specimens from around the world and then breeds varieties to produce turf that is wear tolerant, drought tolerant, salt tolerant, disease tolerant, and in some varieties, herbicide tolerant, while still being the most beautiful turf available.

These varieties are produced and marketed as certified seed to ensure genetic purity, by variety name, with minimum crop or weed seed and high germination to make quick, luxuriant turf.

Turf-Seed, Inc. works with the best growers to increase these varieties and has production in many states and countries.

Major product lines:

Kentucky Bluegrasses: Midnight, Midnight II, Midnight Star, Moonlight, Northstar, Brilliant, and Unique. All these varieties are genetically different and when used in

Seed yield evaluation trials located at Pure-Seed Testing, Inc. West research farm in Hubbard, OR.

blends, each makes a contribution toward the turf quality.

Perennial Ryegrasses: Brightstar SLT (salt tolerant), Citation Fore (gray leaf spot resistant), Catalina II (salt tolerant), Gray Star (gray leaf spot resistant), Silver Dollar (gray leaf spot resistant and dollar spot tolerant), and Quick-silver (glyphosate tolerant).

Tall Fescues: Endeavor, Tarheel, Wolfpack, Olympic Gold (all brown patch resistant), Matador GT (glyphosate tolerant), Tarheel II (improved turf performance and brown patch resistance), Apache III, Silver Star, and Silverado II.

Bermudagrasses: Sunbird, a high quality seeded Bermudagrass, offers quick establishment with a very dense canopy of turf and is second only to Riviera and Princess II in Pure-Seed Testing, Inc. East trials, near Raleigh, NC.

Sea Spray Seashore Paspalum: Sea Spray is the industry's first seeded variety of seashore paspalum and is now commercially available in limited quantities. Extremely salt tolerant and adapted to a wide range of soil types, Sea Spray offers superior drought resistance and quick recuperative ability due to its dual root system of rhizomes and stolons. Sea Spray is ideal for golf course greens, fairways, and tees as well as sports applications.

Trials for gray leaf spot resistance on perennial ryegrass depicting improved resistance. Gray Hawk is a blend of these varieties including Gray Star and Silver Dollar.

Turfco Manufacturing
763-785-1000
scott@turfco.com

THE LEADER. SINCE 1961.

Product focus:

Turfco Manufacturing is the No. 1 brand of top dressers for golf applications. In fact, Turfco developed the world's first top dresser in 1961 and continues to lead the industry in the development of innovative, patented new top dressing and material handling technologies, working hand-in-hand with superintendents.

Turfco products are renowned for their solid quality and durability in the field. This is backed by the company's exclusive three-year warranty on all top dressers, the longest in the industry. In addition to top dressers, Turfco manufactures a wide range of equipment for commercial turf maintenance and upkeep, including aerators, overseeders, dethatchers, sod cutters and more.

Manufacturing Facilities:

All Turfco golf course maintenance products are designed and manufactured at the company's Minneapolis, MN, headquarters.

Technical Support, Sales, Training and Customer Service:

Turfco's nationwide network of dealers provide customers with local sales and technical support. Turfco also offers toll-free customer service and technical support by calling 800-679-8201, or by fax at 763-785-0556.

Major Product Lines:

WideSpin™ 1530—Turfco's WideSpin™ 1530 broadcast top dresser is ideal for superintendents who implement a light, frequent top dressing program. The machine can spread a light top dressing up to 30 feet wide with a clean, uniform application with no dragging required. The WideSpin 1530 can also broadcast a heavy top dressing an unprecedented 15 feet in diameter. An available cross-conveyor attachment further enhances the multi-functional versatility of the WideSpin 1530.

CR-10—The Turfco CR-10 top dresser and material handler is ideal for moving large volumes of materials. With innovative material handling features including a patented three-position controller, the CR-10 is versatile enough to handle a variety of renovation projects, including trench filling, bunker renovation, and other daily course maintenance. When used as a top dresser, the proven CR-10's exclusive WideSpin technology makes it capable of broadcast widths of up to 40 feet.

Mete-R-Matic®—Turfco's patented Mete-R-Matic® chevron conveyor belt sits at the heart of the Mete-R-Matic line of top dressers, ensuring uniform, consistent top dressing, regardless of application rate. Models in the Mete-R-Matic line include:

- ▶ Mete-R-Matic—Walk-behind top dresser
- ▶ Mete-R-Matic III—Tow-type top dresser
- ▶ Mete-R-Matic XL—Extra-large tow-type top dresser
- ▶ Mete-R-Matic UTM-60—Universal truck-mounted top dresser

Date founded:

2002 under the ZScreen
name

Staff:

Craig and Bruce Zeller,
Presiding members

Clay Mullenax,

Sales, Customer Service

Product focus:

ZScreen LLC specializes in the manufacturing of material separation devices for the golf course and construction industry. All of our products are designed to follow the concept of maximum efficiency with little or no maintenance. Our screen systems range in size from 7-yard loader capacity at 12" minus output, to the Sand Storm, which produces a final product within the USGA bunker specification.

Manufacturing facility:

All of our screening systems are hand-built in our manufacturing facility in Phoenix to fit the specific needs of our clientele.

Technical service, sales, and customer support:

Technical service and customer service issues are handled by our staff at the manufacturing facility in Phoenix. Sales are conducted through one of our distributors or through the Phoenix facility if no distributor is available in the customer's immediate area. Parts are available through our Phoenix facility, as well as some

of our distributors. Service concerns (we've only had one in the last three years) are currently dispatched from our Phoenix facility.

Major product lines:

Our two main product lines consist of construction grade grizzlies and screen faces, and the golf industry's Sand Storm.

The Sand Storm is a towable, 12-volt DC-powered vibratory screening system designed to remove rocks, clays, silts, and other undesirable debris from bunker sand. There are no plastic or composite parts on the Sand Storm. Thus, the premature wear and breakdown factor often associated with cheaper manufacturing materials is all but eliminated. Every Sand Storm is individually hand cut, drilled, fitted and welded by one of our skilled technicians, then inspected personally by the management staff before the powdercoat finish is applied. All Sand Storms come equipped with either a Vibco or Bosch (EU-compliant) 12-volt DC-powered vibratory motor. Turf-friendly tires, a removable waste bin and quick-attach tow hitch finish off this one of a kind revolutionary product.
