

PERCEPTION

REALITY

Some people seem to have the perception that all biological products are a little like snake oil or just "bugs in a jug". And frankly, some of them are. We've tested them. We know.

In reality, we've tested ours as well, at over 25 major US universities* and know that our products work and are worth your investment. At Roots®/Novozymes we are serious about research. We employ over 500 scientists world-wide and invest over \$130 million in research annually. So, when we say Roots products work, we mean it and back it up with documented university research and consistent product benefits like:

1. Overall better plant health
2. Low thatch accumulation
3. Reduced chemical fungicide use
4. Better stress tolerance
5. Better drought resistance

If you want to maintain turf root mass during summer stress**, it's time you give Roots a try.

It's Time to Try TurfVigor® Microbial Fertilizer 9-3-6.

It's easy. Apply to greens and tees, and see the difference. It's just that simple. Contact your local Roots distributor today.

* Rutgers, VA Tech, U of WI, MI State, Penn State and over 20 other major universities.

**Countryside GC, Roanoke, VA.

A Great Notion

"There is not a week that goes by that we don't make a change, significant or small, to what we are doing because of (the staff's) input."

JOHN SZKLINSKI

SOUTHERN HILLS GOLF CLUB

Continued from page 40

If your employees aren't offering up ideas on a regular basis, it's time to ask why.

"There's obviously a barrier there," says Dean Schroeder, co-author of "Ideas Are Free: How The Idea Revolution is Liberating People and Transforming Organizations" (Berrett-Koehler Publishers, 2004). "[Apparently] employees don't think their ideas are welcome, there isn't a natural process in place, or something is sending a message that ideas aren't welcome. Sometimes you have to go out of your way to make sure everyone truly believes that ideas are welcome."

Schroeder says managers must create a system in which all ideas are captured, acknowledged and, when worthy, implemented. They need to be smart about the systems they choose. Suggestion boxes too often are black holes. Ideas go in (many of which are not useful) and follow-up is nil. Likewise, simply having an open-door policy is typically not enough. Busy superintendents

are rarely in the office, and when they are, employees are often too intimidated to bother their bosses with small ideas.

You may use a simple written form or opt for group discussions. Whatever method you choose, the key is to make the system a routine part of your business and to not let ideas fall through the cracks. Also, be sure the idea-gathering system is accessible to all employees, including those whose first language is not English.

"Just because they can't speak English doesn't mean they are dumb," Schroeder says. "Have things printed in both languages or have someone translate for them. That creates a sense of ownership that really does make a difference in how they look at the world."

Start small

Big, dramatic ideas get more than their share of attention. After all, they promise the biggest rewards. So managers are usually surprised

Continued from page 42

when Schroeder suggests they instead pursue small ideas aggressively.

"More than 90 percent of your ideas are the small ones," Schroeder says. "You want to focus on them because they are less disruptive and you can quickly implement them. Plus, you never know where they will lead."

As evidence, Schroeder offers eight reasons why small ideas are so important.

1. They build competitive advantage because they are typically too specific to be useful to the competition.

2. Employees focused on small ideas meticulously mind the details and provide better service.

3. They can often be useful throughout the business.

4. They can be steppingstones that lead to bigger ideas and opportunities.

5. When they appear in patterns, they can pinpoint bigger problems and opportunities.

6. By revealing gaps in knowledge or skills, they can identify important training needs.

7. They come up frequently, giving man-

agers plenty of experience at managing and measuring them.

8. Individually they may not amount to much, but taken together they amass into a big competitive advantage.

Clearly, small ideas are important. To get them it's critical to listen to your front-line employees who see the day-to-day operation and know what needs to change to improve the details that can make or break a golfer's day.

Employees at Southern Hills Country Club in Tulsa, Okla., meet daily with superintendent John Szklinski. They frequently offer up ideas to streamline their jobs and make the course more effective.

"The staff members bring with them a lot of experience and value," Szklinski says. "There is not a week that goes by that we don't make a change, significant or small, to what we are doing because of their input."

Grow the program

Once you have a system for capturing small ideas, the next step is to get bigger, better and more ideas. Giving ideas must be every employee's job and getting ideas should be every manager's job. If you use a weekly meeting for idea gathering, require that every person come with at least one idea, no matter how small. Ask the staff to discuss and refine each idea. The group can decide which ideas should be implemented and decide who will be responsible for doing so.

This is a good system, Schroeder says, because it charges all employees with idea generation, makes it easy to submit ideas, generates instant discussion and feedback, allows for quick decision making, and makes implementation quick and easy.

Make the meetings even more effective by asking for ideas to resolve particular problems, such as turf maintenance or watering schedules. "Turn the idea system into a strategic weapon," Schroeder says.

"We don't want teamwork, we demand it," Tegtmeier says. At staff meetings he encourages employees to identify problems, from a leaky sprinkler head to signs of turf disease, and come up with solutions for fixing them. "We want their input 100 percent on everything. I put everything on their shoulders and give them an opportunity to come up with an idea."

Continued on page 46

Just Say No

When employees start throwing dozens or hundreds of ideas your way, there are bound to be a few duds in the lot. It can be a challenge to reject bad ideas without dissuading future contributions. "That's the true art of managing ideas," says Dean Schroeder, co-author of *Ideas Are Free: How the Idea Revolution is Liberating People and Transforming Organizations* (Berrett-Koehler Publishers, 2004).

If the idea was clearly not given in good faith, it's OK to brush off the employee with a simple "thanks, but no thanks." When the idea was genuine, however, use the rejection process as a learning experience.

"Bad ideas are great teaching moments," Schroeder says. "If you get a string of bad ideas, you may realize you need to have a training session. The more employees understand how the company works, the better they will do their jobs. Bad ideas give you opportunities to identify weaknesses in employee knowledge."

Tim O'Neill, certified superintendent at the Country Club of Darien (Conn.), sometimes allows his employees to pursue bad ideas. Making mistakes can be a learning experience. "In a lot of ways I think of a golf course as a big laboratory," O'Neill says. "I've made mistakes myself over the course of years. I've learned best from experiences. I'm all for empowering people to learn from mistakes."

When an employee suggests an idea that you simply can't implement for safety reasons, explain why. If the employee suggests a real problem but his or her solution won't work, work with the employee to brainstorm new ideas. Also, always talk to employees about bad ideas — they may just need to clarify or explain what they meant. As long as you accept a good share of ideas, employees won't be deterred by a few rejections.

TifEagle Bermudagrass

The Closer You Look The More Impressive The View

You're looking at one of the pristine TifEagle greens nestled among the coconut palms at Antiburi Samui Country Club in Samui, Thailand. Impressive view, isn't it? Impressive grass, too. No wonder TifEagle is spreading wildfire across the putting surfaces of one of the most impressive clubs around the world. In Argentina, Australia, Mexico, China, Thailand, Hong Kong, and especially right here in the good old US of A. From the scorching courses of the desert Southwest to the palm-lined greens of the Sunshine State, TifEagle has landed. It's not hard to figure out why. TifEagle Bermudagrass was bred to stand up to the physical stress produced by extremely low mowing heights. With frequent watering, mowing, grooming and light top dressings,

TifEagle requires less verticutting to control thatch buildup than the other ultradwarfs. TifEagle also recovers more quickly from injury, has better color, and is extremely cold hardy, drought tolerant and disease resistant. So whether you're involved with the repair or restoration of your existing greens, or installing an entire new course, insist on the best. Specify TifEagle Bermudagrass by name. It's the ultimate ultradwarf bermudagrass.

A Great Notion

Continued from page 44

I always have ideas, but I'm not so big to think that my ideas are better."

Get supervisors excited about the program by making them responsible for getting ideas from their crews, experts says. Create healthy competition by posting in a public place how many ideas have come in from each team. Some facilities also track and assess idea generation in individual employee performance evaluations.

Recognizing results

When employees start offering ideas and solutions that work, they deserve recognition. Your impulse might be to dole out dollars, but Schroeder calls that "a big disaster."

A per-idea reward may encourage frivolous ideas. It also creates a tangible award for something of intangible value. Do you pay the same amount for a small idea as a big idea? Do you split the

reward if a group of employees comes up with the idea?

"Most people, myself included, work because they have to earn a living," Szklinski says. "But they want other satisfaction beyond pay. I want to feel that I add value to this operation. If staff members see their ideas being implemented, there's a level of satisfaction for them beyond compensation."

Listening to employees, using their ideas and giving public recognition are the best rewards, Schroeder says.

The efforts in creating an employee think tank are far outweighed by the rewards. With an open mind (remember, you don't know it all) and a good system, your club will improve, your employees will be happier and your job will be easier.

"It's obvious to me that employees who are more involved feel like part of the team," says Tim O'Neill, certified superintendent at the Country Club

Do's and Don'ts of Getting Employee Input:

DO

- Focus on small ideas
- Create a formal system
- Recognize ideas
- Follow through

DON'T

- Wait for monumental ideas
- Stick out a suggestion box
- Offer cash rewards
- Wait too long to implement

of Darien (Conn.) and president of the Golf Course Superintendents Association of America. "They are better employees for it. They are happier and feel like they are part of the team. That's why managers should let their staff participate in ideas." ■

As superintendents, we expect
loyalty from those under us.

But we must not expect it blindly

By Ron Furlong

PLEDGE OF

Allegiance

When I recently turned 40, I chose to celebrate the momentous life event not as a negative but as a great positive. As an opportunity. An opportunity — no, make that a right — to begin

imparting my vast arsenal of wisdom on to others. So, on a cold, windy day earlier this year I began thinking of which portion of my brain to pass on to others. There were so many choices ... so many deep caverns to explore and then release. I gave myself a headache, in fact. After a couple of aspirin and some deep breaths, I delved again into the subconscious. What did I need to say? What did I need to pass along?

I came up with one word. One simple, rather short word. But a nice word. The word is “loyalty.” So here’s my spin on it. Remember, you have to listen to me. I’m now an elder.

The Oxford English Dictionary says that loyalty “implies a faithfulness that is steadfast in the face of any temptation to renounce, desert or betray.” Unswerving allegiance, if you will.

How about this? Picture a tree; perhaps a Norway maple, a beautiful specimen sitting in the rough just off the approach on your fifth hole. Do you have it pictured? Now, ask yourself this. Could one say that a plant is loyal to its seed? Is the trunk of a tree loyal to its roots? Are the branches loyal to the trunk? And are the leaves, in turn, loyal to the branches?

Good questions, no?

There are a few other words that one tends to think of when contemplating loyalty: values, virtues, morals and ethics.

Values, in general, are those conceptions that are generally accepted in a society as desirable and which offer guidance. Virtues are the ability to behave in accordance with individual values. Morals could be described as the sum of principles that define what is ethically right or wrong, good or bad. And ethics are the study of the rules and elements of conduct that determine human behavior.

So, how is loyalty tied in with these other terms, and what in the name of all that is good am I trying to say here?

Let me start with this: I’ve been thinking a lot recently of what loyalty is and what it means. It seems like all around us, especially in the business of golf course management, loyalty is disappearing. Ethics are blurred. Virtues are fading. The phrase “dog eat dog” is becoming more apropos.

Personally, I’ve always considered loyalty to be one of the most important virtues by which I live my life. I’ve always made it a point to be loyal to my superior. No one ever taught me this. It wasn’t a class in school. It was a choice that I, at some point and certainly not consciously, made. Loyalty, however, does need to be reciprocated. Loyalty grows out of a more basic quality, which is mutual respect.

nce

If someone respects and values you as you respect and value them, loyalty grows and is not a negative. It can be difficult to remain loyal when trust is broken.

Here's my quick story: Years ago while working at a golf course I became aware that the superintendent was going to be fired the next day. I should not have been told this. And the person who told me should not have been told this.

The only person who should have been told this was the superintendent when he got fired. The assistant was actually told by ownership that the superintendent would be fired and he would get the job. A horribly unethical situation for all involved. I also faced the prospect that the superintendent's firing, followed by the assistant's promotion, could very well lead to my promotion to the assistant position.

Where did my loyalty lie? With the assistant, who I liked very much and was probably going to make me the next assistant? Or with the superintendent, who I actually had a bit of a strained relationship with and who would probably never promote me?

Strangely enough, I never questioned it. My loyalty lied with the superintendent. Despite the strained relationship he had with the rest of the crew and myself, he had my respect, and I believe I had his.

And of course the complete and disgusting breach of ethics gave me no choice. I called the superintendent that night and told him what I knew. After a sleepless night the frantic superintendent came in the next day and sure enough was let go. Did my warning help him at all? Probably not. But I felt it my duty to tell him.

I've heard too often as of late stories of lost loyalty and ethics breached.

Perhaps keeping silent would have been the proper course of action. I don't know. But loyalty, virtues, values, morals and ethics all need to be considered. We cannot just turn a blind eye, even if it would strengthen our own position.

In the same respect, I don't feel that loyalty should be completely blind. Take the Marines, for instance. They regard the term of loyalty as: "A Marine displaying enthusiasm in carrying out an order of a senior, though he may privately disagree with it." Also, "The job has to be done. ... Always faithful. ...

You owe unswerving loyalty up and down the chain of command."

I don't think we want to go to these extremes. However, one must always remember for whom they work and what that means. I've heard too often as of late stories of lost loyalty and ethics breached. It might do us all some good to review the Golf Course Superintendents Association of America's (GCSAA) Code Of Ethics from time to time. We should not only review the code, but also consider why it was created in the first place.

As superintendents, we expect loyalty from those under us. But we must not expect it blindly. Earn respect and trust. Earn loyalty.

The following are such strong words to consider from time to time — values, virtues, morals, ethics and loyalty. You should stop and consider them someday soon. And when you turn 40, you can spout off about them. It's your right.

Now, I must get back into that brain of mine and see what else I have to offer. It's awful roomy and spacious in here. I'm afraid I may have tapped the source. ■

Ron Furlong is the superintendent of Avalon Golf Club in Bellingham, Wash., and a frequent contributor to Golfdom.

In preparation for last month's U.S. Open Championship, *Sports Illustrated* invited yours truly to join a roundtable discussion with PGA Tour pro Brad Faxon, Callaway executive Larry Dorman and USGA Executive Director David Fay. The first subject to come up was last year's U.S. Open at Shinnecock Hills, where Fay had claimed that the famed seventh green was rolled Saturday night.

David Fay: And on the rolling, we can go on and on about that, but that's our fault. The rolling took place. It was not done at our request. It was done in the middle of the night.

GeoffShac: In the middle of the night?

DF: In the middle of the night.

GS: Really?

DF: In the middle of the night.

GS: That's ... (laughs)

DF: In the middle of the night.

Naturally, I heard rumors that USGA officials claimed that something happened in the night, before Sunday's disastrous finale. Upon returning from the roundtable, I received an e-mail that may back up Fay's seemingly ridiculous assertion.

Earl Spackler, cousin of Bushwood Country Club's infamous assistant super Carl, was born into the Spacklers of Southampton a few years after Carl. He has never met Carl, but he's been a "big fan" of Carl's registered bent for years.

Earl sometimes sleeps on a cardboard box placed in underbrush near the intersections of Tuckahoe and Sebonac. Though he would not reveal how he accesses the Internet, Earl did answer questions via instant messaging.

GeoffShac: Did you, Earl Spackler, cousin of Carl, roll Shinnecock Hills' seventh green "in the middle of the night" between Saturday night and Sunday morning, June 19 and 20, 2004?

ESpack: I did.

GeoffShac: Have you been charged with trespassing or breaking and entering the Shinnecock Hills maintenance building?

ESpack: No, you see, I work quietly. The security guards never saw me. And the USGA people don't know it was me because they travel in a constant state of unconsciousness. It's a Zen power I have. I've always worked all over the radar screen. The only people who saw me

ON MACDONALD
AND RAYNOR?

were the USGA officials who dreamed of doing what I was doing, as I was doing it. You follow?

GeoffShac: And how do you know they saw you in their dreams?

ESpack: I looped for some of them Monday after the tourney. They shared their dreams with me as we waited for a crew to finish syringing the seventh green for, like, the millionth time.

GeoffShac: It was really windy in the wee hours Sunday. Andy North famously couldn't keep his hair in place. How did you operate the roller in such gusts and in the dark?

ESpack: It goes back to the Zen thing. I have great strength.

GeoffShac: So why did you pick the seventh green to roll? It's so far from the maintenance building?

ESpack: I was doing it for C.B. [Macdonald] and Seth [Raynor]. I wanted to bring attention to their genius, since, you know, William Flynn gets all the credit for that hole and it's just wrong, man. Wrong. C.B. and Seth built that hole before Flynn was even a shoveler working for Hugh Wilson at Merion.

GeoffShac: By turning the seventh green into a freak show, you thought that would reflect well on Macdonald and Raynor?

ESpack: Oh, no question. Their genius emerged Sunday when those guys had to come out and water the green.

GeoffShac: Why are you claiming responsibility now, a year after the Open?

ESpack: Because these USGA guys need vindication. We need more days in golf like Sunday at Shinnecock. And more like '99 at Carnegie.

GeoffShac: You mean Carnoustie?

ESpack: It's all one and the same, man.

Geoff Shackelford can be reached at geoff@geoffshackelford.com.
