

DELIVERS MULTI-MODE SNOWMOLD PROTECTION AND CURATIVE ACTION

FF III FUNGICIDE Offers Broad Spectrum Control Of Pink AND Gray Snowmold

FF III is a unique combination of PCNB, Propiconazole, and Chlorothalonil that can be applied in one application for broad spectrum snowmold control. PLUS it's combined with a 7-0-14 fertilizer analysis for enhanced spring turf color and quality.

With a particle size of 75 SGN, FF III gets right down through the turf canopy so it can get to work protecting and treating the turf roots and surrounding soil. You should find out more and now's the time to take action.
