FROM THE GOLF COMMITTEE:

Our first golf outing will be held at Oconomowoc Country Club on Monday, April 25. Harvey Miller is our Host Superintendent and R & S Parts will handle the evenings festivities.

Since most of us will not have had much chance to "limber up", no event is planned, although there will be several surprises on the golf course. There will be no tee off times, so get a foursome together and tee it up after 12:00. Lunch will be available after 11:00 AM. Cart rental fee is \$9.00. One note: due to the increasing cost of prizes, we have been forced to raise our Blind Bogey rate to \$3.00.

Last month at West Bend, we had over fifty members for lunch. That was a great turnout for our first meeting, but only 35 people returned cards to me. The cards are meant to give the host club and their kitchen staff an accurate count as to how much food to order and prepare. Help the host club by sending your return cards in on time.

The golf committee has planned a lot of great golf

events for our meetings this year. Our one stumbling block is and always has been a fair handicapping system. We would really appreciate it if you would consider joining the Wisconsin Golf Association (WGA)--for a couple dollars our events would be easier to run and fair for everybody. It's a computerized handicapping system and well worth the money.

We hope everyone comes through the winter in good shape --maybe one of these days it'll warm up. See you at Oconomowoc.

Bill Douglas,  
Chairman

## NORTH SHORE H<sub>2</sub>O REPORT By Bill Douglas

There are many instances and situations that can cause turf loss--disease, insects, vandalism. In each of these plights, man is the controlling factor, as he can alleviate these problems with sound, professional management techniques. But what happens when a well goes dry and a Superintendent is faced with a drought situation? The following

# 2-FISTED ATTACK ON ALGAE in ponds and lakes

1. Use LIQUID ALGIMYCIN PLL-C for quick control of filamentous and other kinds of floating algae.

2. Use SLOW RELEASE ALGIMYCIN PLL-C PELLETS to control branched or attached algae -- especially Chara and Nitella.
